

Datasheet for ABIN3136326 TCTN1 Protein (AA 23-593) (His tag)

Overview

| Quantity: | 1 mg |
|-------------------------------|--|
| Target: | TCTN1 |
| Protein Characteristics: | AA 23-593 |
| Origin: | Mouse |
| Source: | Insect Cells |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This TCTN1 protein is labelled with His tag. |
| Application: | Crystallization (Crys), ELISA, SDS-PAGE (SDS), Western Blotting (WB) |

Product Details

| Sequence: | QVIAIPAAAT PAVTKEDLNS TKATPTTLQP SLSPRTPGTP RAPERSGPRP TPVTDVAALC |

| Characteristics: Made in Germany - from design to production - by highly experienced protein experts. Mouse Tctn1 Protein (raised in Insect Cells) purified by multi-step, protein-specific proensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made to order protein and will be made for the first time for your order. Cexperts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to ordering cust made proteins from other companies is that there is no financial obligation in case the protein be expressed or purified. In the unlikely event that the protein cannot be expressed or purified we do not charge ar |
|---|
| experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to ordering cus made proteins from other companies is that there is no financial obligation in case the pr cannot be expressed or purified. |
| The big advantage of ordering our made-to-order proteins in comparison to ordering cus made proteins from other companies is that there is no financial obligation in case the pr cannot be expressed or purified. |
| made proteins from other companies is that there is no financial obligation in case the proteins be expressed or purified. |
| cannot be expressed or purified. |
| |
| In the unlikely event that the protein cannot be expressed or purified we do not charge ar |
| |
| (other companies might charge you for any performed steps in the expression process for |
| custom-made proteins, e.g. fees might apply for the expression plasmid, the first express |
| experiments or purification optimization). |
| When you order this made-to-order protein you will only pay upon receival of the correctly |
| folded protein. With no financial risk on your end you can rest assured that our experienc |
| protein experts will do everything to make sure that you receive the protein you ordered. |
| The concentration of our recombinant proteins is measured using the absorbance at 280 |
| The protein's absorbance will be measured in several dilutions and is measured against i |
| specific reference buffer. |
| The concentration of the protein is calculated using its specific absorption coefficient. W |
| the Expasy's protparam tool to determine the absorption coefficient of each protein. |
| Purification: Two step purification of proteins expressed in baculovirus infected SF9 insect cells: |
| In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE. |
| Protein containing fractions of the best purification are subjected to second purification through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot. |
| Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot. |
| Sterility: 0.22 µm filtered |
| Endotoxin Level: Protein is endotoxin free. |
| Grade: Crystallography grade |

Target Details

| Target: | TCTN1 |
|---|---|
| Alternative Name: | Tctn1 (TCTN1 Products) |
| Background: | Component of the tectonic-like complex, a complex localized at the transition zone of primary |
| | cilia and acting as a barrier that prevents diffusion of transmembrane proteins between the cilia |
| | and plasma membranes. Regulator of Hedgehog (Hh), required for both activation and |
| | inhibition of the Hh pathway in the patterning of the neural tube. During neural tube |
| | development, it is required for formation of the most ventral cell types and for full Hh pathway |
| | activation. Functions in Hh signal transduction to fully activate the pathway in the presence of |
| | high Hh levels and to repress the pathway in the absence of Hh signals. Modulates Hh signal |
| | transduction downstream of SMO and RAB23. {ECO:0000269 PubMed:16357211, |
| | ECO:0000269 PubMed:21725307, ECO:0000269 PubMed:22179047}. |
| Molecular Weight: | 62.1 kDa Including tag. |
| UniProt: | Q8BZ64 |
| Pathways: | Tube Formation |
| Application Details | |
