Datasheet for ABIN3136410

NLRP10 Protein (AA 1-673) (Strep Tag)

Go to Product page

Overview

Quantity:	250 µg
Target:	NLRP10
Protein Characteristics:	AA 1-673
Origin:	Mouse
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This NLRP10 protein is labelled with Strep Tag.
Application:	ELISA, SDS-PAGE (SDS), Western Blotting (WB)

Product Details

Brand:	AliCE®
Sequence:	MALARANSPQ EALLWALNDL EENSFKTLKF HLRDVTQFHL ARGELESLSQ VDLASKLISM YGAQEAVRVV SRSLLAMNLM ELVDYLNQVC LNDYREIYRE HVRCLEERQD WGVNSSHNKL LLMATSSSGG RRSPSCSDLE QELDPVDVET LFAPEAESYS TPPIVVMQGS AGTGKTTLVK KLVQDWSKGK LYPGQFDYVF YVSCREVVLL PKCDLPNLIC WCCGDDQAPV TEILRQPGRL LFILDGYDEL QKSSRAECVL HILMRRREVP CSLLITTRPP ALQSLEPMLG ERRHVLVLGF SEEERETYFS SCFTDKEQLK NALEFVQNNA VLYKACQVPG ICWVVCSWLK KKMARGQEVS ETPSNSTDIF TAYVSTFLPT DGNGDSSELT RHKVLKSLCS LAAEGMRHQR LLFEEEVLRK HGLDGPSLTA FLNCIDYRAG LGIKKFYSFR HISFQEFFYA MSFLVKEDQS QQGEATHKEV AKLVDPENHE EVTLSLQFLF DMLKTEGTLS LGLKFCFRIA PSVRQDLKHF KEQIEAIKYK RSWDLEFSLY DSKIKKLTQG IQMKDVILNV QHLDEKKSDK KKSVSVTSSF SSGKVQSPFL GNDKSTRKQK KASNGKSRGA EEPAPGVRNR RLASREKGHM EMNDKEDGGV EEQEDEEGQT

Product Details

	LKKDGEMIDK MNG **Sequence without tag. The proposed Strep-Tag is based on experience s with the expression system, a different complexity of the protein could make another tag necessary. In case you have a special request, please contact us.**
Characteristics:	Key Benefits: • Made in Germany - from design to production - by highly experienced protein experts. • Protein expressed with ALiCE® and purified in one-step affinity chromatography • These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed). • State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein. The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified. Expression System: • ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications. • During lysate production, the cell wall and other cellular components that are not required for protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein! Concentration: • The concentration of our recombinant proteins is measured using the absorbance at 280nm. • The protein's absorbance will be measured against its specific reference buffer. • We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.
Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).

Product Details

Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made

Target Details

Target:	NLRP10
Alternative Name:	Nlrp10 (NLRP10 Products)
Background:	NACHT, LRR and PYD domains-containing protein 10,FUNCTION: Inhibits autoprocessing of CASP1, CASP1-dependent IL1B secretion, PYCARD aggregation and PYCARD-mediated apoptosis but not apoptosis induced by FAS or BID (By similarity). Displays anti-inflammatory activity (By similarity). Required for immunity against C.albicans infection (PubMed:23071280). Involved in the innate immune response by contributing to pro-inflammatory cytokine release in response to invasive bacterial infection (By similarity). Contributes to T-cell-mediated inflammatory responses in the skin (PubMed:27221772). Plays a role in protection against periodontitis through its involvement in induction of IL1A via ERK activation in oral epithelial cells infected with periodontal pathogens (By similarity). Exhibits both ATPase and GTPase activities (By similarity). {ECO:0000250|UniProtKB:Q86W26, ECO:0000269|PubMed:23071280, ECO:0000269|PubMed:27221772}.
Molecular Weight:	76.4 kDa
UniProt:	Q8CCN1
Pathways:	Inflammasome

Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications. During lysate production, the cell wall and other cellular components that are not required for protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional

	components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!
Restrictions:	For Research Use only

Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol **Might differ depending on protein.**
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
