Datasheet for ABIN3136502 AGO4 Protein (AA 1-861) (His tag)

Image

Overview

Quantity:	1 mg	
Target:	AGO4 (EIF2C4)	
Protein Characteristics:	AA 1-861	
Origin:	Mouse	
Source:	Insect Cells	
Protein Type:	Recombinant	
Purification tag / Conjugate:	This AGO4 protein is labelled with His tag.	
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)	

Product Details

special r	equest, please contact us.
Mouse ensure	n Germany - from design to production - by highly experienced protein experts. Ago4 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to crystallization grade. of-the-art algorithm used for plasmid design (Gene synthesis).
This prot	ein is a made to order protein and will be made for the first time for your order. Our
experts i	n the lab will ensure that you receive a correctly folded protein.
The big a	dvantage of ordering our made-to-order proteins in comparison to ordering custom
made pro	oteins from other companies is that there is no financial obligation in case the protein
cannot b	e expressed or purified.
In the un	ikely event that the protein cannot be expressed or purified we do not charge anything
(other co	mpanies might charge you for any performed steps in the expression process for
custom-r	nade proteins, e.g. fees might apply for the expression plasmid, the first expression
experime	ents or purification optimization).
When yo	u order this made-to-order protein you will only pay upon receival of the correctly
folded pr	otein. With no financial risk on your end you can rest assured that our experienced
protein e	xperts will do everything to make sure that you receive the protein you ordered.
The conc	entration of our recombinant proteins is measured using the absorbance at 280nm.
	ein's absorbance will be measured in several dilutions and is measured against its efference buffer.
•	energine burner. entration of the protein is calculated using its specific absorption coefficient. We use
	sy's protparam tool to determine the absorption coefficient of each protein.
· · · · ·	
	purification of proteins expressed in baculovirus infected SF9 insect cells:
differe	st purification step, the protein is purified from the cleared cell lysate using three nt His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate ns are analyzed by SDS-PAGE.
throug	n containing fractions of the best purification are subjected to second purification step h size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and rn blot.
Purity: >95 % as	determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility: 0.22 µm	filtered

Product Details	
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade

Target Details

Target:	AGO4 (EIF2C4)	
Alternative Name:	Ago4 (EIF2C4 Products)	
Background:	Required for RNA-mediated gene silencing (RNAi). Binds to short RNAs such as microRNAs (miRNAs) and represses the translation of mRNAs which are complementary to them. Lacks endonuclease activity and does not appear to cleave target mRNAs. {ECO:0000255 HAMAP-Rule:MF_03033, ECO:0000269 PubMed:19174539}.	
Molecular Weight:	98.0 kDa Including tag.	
UniProt:	Q8CJF8	
Pathways:	Fc-epsilon Receptor Signaling Pathway, Regulatory RNA Pathways, EGFR Signaling Pathway, Neurotrophin Signaling Pathway, Cellular Glucan Metabolic Process	

Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only

Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
