## Datasheet for ABIN3136646 BST2 Protein (AA 52-152) (His tag)

Image

Overview

Quantity:	1 mg	
Target:	BST2	
Protein Characteristics:	AA 52-152	
Origin:	Mouse	
Source:	Escherichia coli (E. coli)	
Protein Type:	Recombinant	
Purification tag / Conjugate:	This BST2 protein is labelled with His tag.	
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)	
Product Details		
Sequence:	TANSVACRDG LRAQAECRNT THLLQRQLTR TQDSLLQAET QANSCNLTVV TLQESLEKKV	
	SQALEQQARI KELENEVTKL NQELENLRIQ KETSSTVQVN S	
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a	
	special request, please contact us.	
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.	
	<ul> <li>Mouse Bst2 Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade.</li> </ul>	
	State-of-the-art algorithm used for plasmid design (Gene synthesis).	
	This protein is a made to order protein and will be made for the first time for your order. Our	
	This protein is a made to order protein and will be made for the first time for your order. Our	
	experts in the lab will ensure that you receive a correctly folded protein.	

Product Details		
	cannot be expressed or purified.	
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything	
	(other companies might charge you for any performed steps in the expression process for	
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression	
	experiments or purification optimization).	
When you order this made-to-order protein you will only pay upon receival of the		
	folded protein. With no financial risk on your end you can rest assured that our experienced	
	protein experts will do everything to make sure that you receive the protein you ordered.	
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.	
	The protein's absorbance will be measured in several dilutions and is measured against its	
	specific reference buffer.	
	The concentration of the protein is calculated using its specific absorption coefficient. We use	
	the Expasy's protparam tool to determine the absorption coefficient of each protein.	
Purification:	Two step purification of proteins expressed in bacterial culture:	
	<ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.</li> </ol>	
	2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.	
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.	
Sterility:	0.22 µm filtered	
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.	
Grade:	Crystallography grade	

## Target Details

Target:	BST2	
Alternative Name:	Bst2 (BST2 Products)	
Background:	IFN-induced antiviral host restriction factor which efficiently blocks the release of diverse	
	mammalian enveloped viruses by directly tethering nascent virions to the membranes of	
	infected cells. Acts as a direct physical tether, holding virions to the cell membrane and linking	
	virions to each other. The tethered virions can be internalized by endocytosis and subsequently	
	degraded or they can remain on the cell surface. In either case, their spread as cell-free virions

	is restricted. Its target viruses belong to diverse families, including retroviridae: human	
	immunodeficiency virus type 1 (HIV-1), mouse mammary tumor virus (MMTV) and murine	
	leukemia virus (MLV), filoviridae: ebola virus (EBOV), arenaviridae: lassa virus (LASV), and	
	rhabdoviridae: vesicular stomatitis virus (VSV). Can inhibit cell surface proteolytic activity of	
	MMP14 causing decreased activation of MMP15 which results in inhibition of cell growth and	
	migration. Can stimulate signaling by LILRA4/ILT7 and consequently provide negative feedback	
	to the production of IFN by plasmacytoid dendritic cells in response to viral infection. Plays a	
	role in the organization of the subapical actin cytoskeleton in polarized epithelial cells.

	ECO:0000269 PubMed:22284121, ECO:0000269 PubMed:22327075}.	
Molecular Weight:	12.3 kDa Including tag.	
UniProt:	Q8R2Q8	
Pathways:	Regulation of Leukocyte Mediated Immunity, Production of Molecular Mediator of Immune	
	Response	
Application Details		

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies	
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee	
	though.	
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the	
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher	
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible	
	options with you in detail to assure that you receive your protein of interest.	
Restrictions:	For Research Use only	

## Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
