Datasheet for ABIN3136647

ACTR8 Protein (AA 1-624) (Strep Tag)

Go to Product page

Overview

Quantity:	1 mg
Target:	ACTR8
Protein Characteristics:	AA 1-624
Origin:	Mouse
Source:	Tobacco (Nicotiana tabacum)
Protein Type:	Recombinant
Purification tag / Conjugate:	This ACTR8 protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)

Product Details

Sequence:	MTQAEKGDAE NGKEKGGEKE KEQRGVKRPI VPALVPESLQ EQIQSNFIVV IHPGSTTLRL GRATDTLPVS VPHVIARRHK QQGQPLYKDN WLLREGLNKP ESNEQRQNGL KMVDQAIWSK KMSNGTRRIP VSPEQTRSYN KQMRPAILDH CSGNKWTNTS QQPEYLVGEE ALYVNPLDCY NIHWPIRRGQ LNIHPGPGGS LTAVLADIEV IWSHAIQKYL EIPLKDLKYY RCILLIPDIY NKQHVKELVH MILMKMGFAG IVVHQESVCA TFGSGLSSTC VVDVGDQKTS VCCVEDGVSH RNTRLCLAYG GSDVSRCFYW LMQRAGFPYR ECQLTNKMDC LLLQHLKETF CHLDQDISGL QDHEFQIRHP DSPALLYQFR LGDEKLQAPM ALFYPATFGI VGQKMTTLQH RSQGDPEDPH DEHYLLATQS KQEQSAKATA DRKSASKPIG FEGDLRGQSS DLPERLHSQE VDLASSQGDC LMAGNESEEA LTALMSRKTA ISLFEGKALG LDKAILHSVD CCSSDDTKKK MYSSILVVGG GLMFHKAQEF LQHRILNKMP PSFRRIIENV DVITRPKDMD PRLIAWKGGA VLACLDTTQE LWIYQREWQR FGVRMLRERA AFVW **Sequence without tag. The proposed Strep-Tag is based on experience s with the expression**

	system, a different complexity of the protein could make another tag necessary. In case you have a special request, please contact us.
Characteristics:	Key Benefits: • Made in Germany - from design to production - by highly experienced protein experts. • Protein expressed with ALiCE® and purified in one-step affinity chromatography • These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed). • State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein. The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified. Expression System: • ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications. • During lysate production, the cell wall and other cellular components that are not required for protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein! Concentration: • The concentration of our recombinant proteins is measured using the absorbance at 280nm. • The protein's absorbance will be measured against its specific reference buffer. • We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.
Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).

Target Details

Target:	ACTR8
Alternative Name:	Actr8 (ACTR8 Products)
Background:	Actin-related protein 8,FUNCTION: Plays an important role in the functional organization of mitotic chromosomes. Exhibits low basal ATPase activity, and unable to polymerize (By similarity). {ECO:0000250}., FUNCTION: Proposed core component of the chromatin remodeling INO80 complex which is involved in transcriptional regulation, DNA replication and probably DNA repair. Required for the recruitment of INO80 (and probably the INO80 complex) to sites of DNA damage Strongly prefer nucleosomes and H3-H4 tetramers over H2A-H2B dimers, suggesting it may act as a nucleosome recognition module within the complex (By similarity). {ECO:0000250}.
Molecular Weight:	70.5 kDa
UniProt:	Q8R2S9

Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications. During lysate production, the cell wall and other cellular components that are not required for protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!
Restrictions:	For Research Use only

Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. If you have a special request,

Handling

	please contact us.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
