

# Datasheet for ABIN3136811 CRTC3 Protein (AA 1-619) (Strep Tag)

Overview

Quantity:	250 µg
Target:	CRTC3
Protein Characteristics:	AA 1-619
Origin:	Mouse
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This CRTC3 protein is labelled with Strep Tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA

## Product Details

Brand:	AliCE®
Sequence:	MAASPGSGSA NPRKFSEKIA LHTQRQAEET RAFEQLMTDL TLSRVQFQKL QQLRLTQYHG
	GSLPNVSQLR NSAPEFQPSL HQADNVRGTR HHGLVERPAR NRFHPLHRRS GDKPGRQFDG

All rights reserved. Sequence without tag. The proposed Strep-Tag is based on experience s with the expression system, a different complexity of the protein could make another tag necessary. In case you have a special request, please contact us.

#### Characteristics: Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- · Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

#### Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
  protein production are removed, leaving only the protein production machinery and the
  mitochondria to drive the reaction. During our lysate completion steps, the additional
  components needed for protein production (amino acids, cofactors, etc.) are added to
  produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

#### Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).

### Product Details

Grade:

custom-made

## Target Details

Target:	CRTC3
Alternative Name:	Crtc3 (CRTC3 Products)
Background:	CREB-regulated transcription coactivator 3 (Transducer of regulated cAMP response element-
	binding protein 3) (TORC-3) (Transducer of CREB protein 3),FUNCTION: Transcriptional
	coactivator for CREB1 which activates transcription through both consensus and variant cAMP
	response element (CRE) sites (PubMed:29211348, PubMed:30611118). Acts as a coactivator,
	in the SIK/TORC signaling pathway, being active when dephosphorylated (PubMed:29211348).
	Acts independently of CREB1 'Ser-133' phosphorylation (By similarity). Enhances the interaction
	of CREB1 with TAF4 (By similarity). Regulates the expression of specific CREB-activated genes
	such as the steroidogenic gene, StAR (By similarity). Potent coactivator of PPARGC1A and
	inducer of mitochondrial biogenesis in muscle cells (By similarity).
	{ECO:0000250 UniProtKB:Q6UUV7, ECO:0000269 PubMed:29211348,
	ECO:0000269 PubMed:30611118}.
Molecular Weight:	67.0 kDa
UniProt:	Q91X84
Pathways:	SARS-CoV-2 Protein Interactome, The Global Phosphorylation Landscape of SARS-CoV-2
	Infection
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from
	Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce
	even the most difficult-to-express proteins, including those that require post-translational
	modifications.
	During lysate production, the cell wall and other cellular components that are not required for
	protein production are removed, leaving only the protein production machinery and the
	mitochondria to drive the reaction. During our lysate completion steps, the additional

Application Details	
	something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol <b>Might differ depending on protein.</b>
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
