# Datasheet for ABIN3136838 CAMK1 Protein (AA 1-374) (His tag)

Image

#### Overview

Quantity:	1 mg
Target:	CAMK1
Protein Characteristics:	AA 1-374
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This CAMK1 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)

### Product Details

Sequence:	MPGAVEGPRW KQAEDIRDIY DFRDVLGTGA FSEVILAEDK RTQKLVAIKC IAKKALEGKE
	GSMENEIAVL HKIKHPNIVA LDDIYESGGH LYLIMQLVSG GELFDRIVEK GFYTERDASR
	LIFQVLDAVK YLHDLGIVHR DLKPENLLYY SLDEDSKIMI SDFGLSKMED PGSVLSTACG
	TPGYVAPEVL AQKPYSKAVD CWSIGVIAYI LLCGYPPFYD ENDAKLFEQI LKAEYEFDSP
	YWDDISDSAK DFIRHLMEKD PEKRFTCEQA LQHPWIAGDT ALDKNIHQSV SEQIKKNFAK
	SKWKQAFNAT AVVRHMRKLQ LGTSQEGQGQ TGSHGELLTP TAGGPAAGCC CRDCCVEPGS
	ELPPAPPPSS RAMD
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Mouse Camk1 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> </ul>

	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Target:	CAMK1
Alternative Name:	Camk1 (CAMK1 Products)

Target Details	
Background:	Calcium/calmodulin-dependent protein kinase that operates in the calcium-triggered CaMKK-
	CaMK1 signaling cascade and, upon calcium influx, regulates transcription activators activity,
	cell cycle, hormone production, cell differentiation, actin filament organization and neurite
	outgrowth. Recognizes the substrate consensus sequence [MVLIF]-x-R-x(2)-[ST]-x(3)-[MVLIF].
	Regulates axonal extension and growth cone motility in hippocampal and cerebellar nerve cell
	Upon NMDA receptor-mediated Ca(2+) elevation, promotes dendritic growth in hippocampal
	neurons and is essential in synapses for full long-term potentiation (LTP) and ERK2-dependen
	translational activation. Downstream of NMDA receptors, promotes the formation of spines
	and synapses in hippocampal neurons by phosphorylating ARHGEF7/BETAPIX on 'Ser-673',
	which results in the enhancement of ARHGEF7 activity and activation of RAC1. Promotes
	neuronal differentiation and neurite outgrowth by activation and phosphorylation of MARK2 or
	'Ser-91', 'Ser-92', 'Ser-93' and 'Ser-294'. Promotes nuclear export of HDAC5 and binding to 14-3
	by phosphorylation of 'Ser-259' and 'Ser-498' in the regulation of muscle cell differentiation.
	Regulates NUMB-mediated endocytosis by phosphorylation of NUMB on 'Ser-276' and 'Ser-29
	Involved in the regulation of basal and estrogen-stimulated migration of medulloblastoma cell
	through ARHGEF7/BETAPIX phosphorylation. Is required for proper activation of cyclin-
	D1/CDK4 complex during G1 progression in diploid fibroblasts. Plays a role in K(+) and ANG2-
	mediated regulation of the aldosterone synthase (CYP11B2) to produce aldosterone in the
	adrenal cortex. Phosphorylates EIF4G3/eIF4GII. In vitro phosphorylates CREB1, ATF1, CFTR,
	MYL9 and SYN1/synapsin I (By similarity). {ECO:0000250, ECO:0000269 PubMed:15150258}.
Molecular Weight:	42.6 kDa Including tag.
UniProt:	Q91YS8
Pathways:	Myometrial Relaxation and Contraction, Regulation of Muscle Cell Differentiation, Smooth
	Muscle Cell Migration

	as well. As the protein has not been tested for functional studies yet we cannot offer a gurante though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.

## Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
