| Endotoxin Level: | Endotoxin has not been removed. Please contact us if you require endotoxin removal. |
| Sterility: | 0.22 µm filtered |
| Purity: | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot. |
| | In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot. |
| Purification: | Two step purification of proteins expressed in bacterial culture: |

| | The concentration of the protein is calculated using its specific absorption coefficient. We use |
| | specific reference buffer. |

Target Details

| | induced cell death by modulating phosphorylation of JNK1-JNK2 (MAPK8 and MAPK9), p38 |
|---------------------|---|
| | (MAPK11, MAPK12, MAPK13 and MAPK14) during oxidative stress. Plays a role in a |
| | staurosporine-induced caspase-independent apoptotic pathway by regulating the nuclear |
| | translocation of AIFM1 and ENDOG and the DNase activity associated with ENDOG. |
| | Phosphorylates STK38L on 'Thr-442' and stimulates its kinase activity. Regulates cellular |
| | migration with alteration of PTPN12 activity and PXN phosphorylation: phosphorylates PTPN12 |
| | and inhibits its activity and may regulate PXN phosphorylation through PTPN12. Acts as a key |
| | regulator of axon regeneration in the optic nerve and radial nerve (By similarity). {ECO:0000250} |
| Molecular Weight: | 36.1 kDa Including tag. |
| UniProt: | Q99KH8 |
| Application Details | |
| Application Notes: | In addition to the applications listed above we expect the protein to work for functional studies |
| | as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee |
| | though. |
| Comment: | Protein has not been tested for activity yet. In cases in which it is highly likely that the |
| | recombinant protein with the default tag will be insoluble our protein lab may suggest a higher |
| | molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible |
| | options with you in detail to assure that you receive your protein of interest. |
| Restrictions: | For Research Use only |
