antibodies

Datasheet for ABIN3137073 PRAS40 Protein (AA 1-257) (His tag)

Overview

| 0.01.0100 | |
|-------------------------------|---|
| Quantity: | 1 mg |
| Target: | PRAS40 (AKT1S1) |
| Protein Characteristics: | AA 1-257 |
| Origin: | Mouse |
| Source: | Insect Cells |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This PRAS40 protein is labelled with His tag. |
| Application: | ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS) |
| Product Details | |
| Sequence: | MASGRPEELW EAVVGAAERF QARTGTELVL LTAAPPPPPR PGPCAYAAHG RGALAEAARR |
| | CLHDIAQAHR AATATRPPGP PPAPQPPSPA PSPPPRPALA REDEEEDEDE PTETETSGER |
| | LGGSDNGGLF MMDEDATLQD LPPFCESDPE STDDGSLSEE TPAGPTACPQ PPATALPTQQ |
| | YAKSLPVSVP VWAFKEKRTE ARSSDEENGP PSSPDLDRIA ASMRALVLRE AEDTQVFGDL |
| | PRPRLNTSDF QKLKRKY |
| | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a |
| | special request, please contact us. |
| Characteristics: | Made in Germany - from design to production - by highly experienced protein experts. |
| | Mouse Akt1s1 Protein (raised in Insect Cells) purified by multi-step, protein-specific process |
| | to ensure crystallization grade. |
| | State-of-the-art algorithm used for plasmid design (Gene synthesis). |
| | This protein is a made to order protein and will be made for the first time for your order. Our |
| | |

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 1/4 | Product datasheet for ABIN3137073 | 09/11/2023 | Copyright antibodies-online. | | experts in the lab will ensure that you receive a correctly folded protein. |
|------------------|---|
| | The big advantage of ordering our made-to-order proteins in comparison to ordering custom |
| | made proteins from other companies is that there is no financial obligation in case the protein |
| | cannot be expressed or purified. |
| | In the unlikely event that the protein cannot be expressed or purified we do not charge anything |
| | (other companies might charge you for any performed steps in the expression process for |
| | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression |
| | experiments or purification optimization). |
| | When you order this made-to-order protein you will only pay upon receival of the correctly |
| | folded protein. With no financial risk on your end you can rest assured that our experienced |
| | protein experts will do everything to make sure that you receive the protein you ordered. |
| | The concentration of our recombinant proteins is measured using the absorbance at 280nm. |
| | The protein's absorbance will be measured in several dilutions and is measured against its |
| | specific reference buffer. |
| | The concentration of the protein is calculated using its specific absorption coefficient. We use |
| | the Expasy's protparam tool to determine the absorption coefficient of each protein. |
| Purification: | Two step purification of proteins expressed in baculovirus infected SF9 insect cells: |
| | 1. In a first purification step, the protein is purified from the cleared cell lysate using three |
| | different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate |
| | fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step |
| | through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot. |
| Purity: | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot. |
| Sterility: | 0.22 µm filtered |
| Endotoxin Level: | Protein is endotoxin free. |
| Grade: | Crystallography grade |
| Target Details | |
| Target: | PRAS40 (AKT1S1) |
| | |

| Alternative Name: | Akt1s1 (AKT1S1 Products) |
|-------------------|--|
| Background: | Subunit of mTORC1, which regulates cell growth and survival in response to nutrient and |
| | hormonal signals. mTORC1 is activated in response to growth factors or amino acids. Growth |

| | factor-stimulated mTORC1 activation involves a AKT1-mediated phosphorylation of TSC1- |
|-------------------|---|
| | TSC2, which leads to the activation of the RHEB GTPase that potently activates the protein |
| | kinase activity of mTORC1. Amino acid-signaling to mTORC1 requires its relocalization to the |
| | lysosomes mediated by the Ragulator complex and the Rag GTPases. Activated mTORC1 up- |
| | regulates protein synthesis by phosphorylating key regulators of mRNA translation and |
| | ribosome synthesis. mTORC1 phosphorylates EIF4EBP1 and releases it from inhibiting the |
| | elongation initiation factor 4E (eiF4E). mTORC1 phosphorylates and activates S6K1 at 'Thr-389', |
| | which then promotes protein synthesis by phosphorylating PDCD4 and targeting it for |
| | degradation. Within mTORC1, AKT1S1 negatively regulates mTOR activity in a manner that is |
| | dependent on its phosphorylation state and binding to 14-3-3. Inhibits RHEB-GTP-dependent |
| | mTORC1 activation. Substrate for AKT1 phosphorylation, but can also be activated by AKT1- |
| | independent mechanisms. May also play a role in nerve growth factor-mediated |
| | neuroprotection. {EC0:0000269 PubMed:14973226, EC0:0000269 PubMed:16397181}. |
| Molecular Weight: | 28.4 kDa Including tag. |
| UniProt: | Q9D1F4 |
| Pathways: | Fc-epsilon Receptor Signaling Pathway, EGFR Signaling Pathway, Neurotrophin Signaling |
| | Pathway, Regulation of Cell Size, Autophagy, BCR Signaling, Warburg Effect |
| | |

Application Details

| Application Notes: | In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though. |
|--------------------|---|
| Comment: | Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest. |
| Restrictions: | For Research Use only |
| Handling | |
| Format: | Liquid |
| Buffer: | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer. |
| Handling Advice: | Avoid repeated freeze-thaw cycles. |
