antibodies

Datasheet for ABIN3137109 CHMP5 Protein (AA 1-219) (His tag)

I Image

Overview

Quantity:	1 mg
Target:	CHMP5
Protein Characteristics:	AA 1-219
Origin:	Mouse
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This CHMP5 protein is labelled with His tag.
Application:	ELISA, SDS-PAGE (SDS), Western Blotting (WB), Crystallization (Crys)
Product Details	
Sequence:	MNRFFGKAKP KAPPPSLTDC IGTVDSRAES IDKKISRLDA ELVKYKDQIK KMREGPAKNM
	VKQKALRVLK QKRMYEQQRD NLAQQSFNME QANYTIQSLK DTKTTVDAMK LGVKEMKKAY
	KEVKIDQIED LQDQLEDMME DANEIQEALG RSYGTPELDE DDLEAELDAL GDELLADEDS
	SYLDEAASAP AIPEGVPTDT KNKDGVLVDE FGLPQIPAS
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Mouse Chmp5 Protein (raised in E. Coli) purified by multi-step, protein-specific process to

• State-of-the-art algorithm used for plasmid design (Gene synthesis).

ensure crystallization grade.

This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.

	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in bacterial culture:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.
Grade:	Crystallography grade
Target Details	
Target:	CHMP5
-	

Alternative Name:	Chmp5 (CHMP5 Products)
Background:	Probable peripherally associated component of the endosomal sorting required for transport
	complex III (ESCRT-III) which is involved in multivesicular bodies (MVBs) formation and sorting
	of endosomal cargo proteins into MVBs. MVBs contain intraluminal vesicles (ILVs) that are

	similarity). {EC0:0000250}.
	and/or membrane fission activities, possibly in conjunction with the AAA ATPase VPS4 (By
	of cytokinesis. ESCRT-III proteins are believed to mediate the necessary vesicle extrusion
	also functions in topologically equivalent membrane fission events, such as the terminal stages
	dissociate from the invaginating membrane before the ILV is released. The ESCRT machinery
	to require the sequential function of ESCRT-0, -I,-II and -III complexes. ESCRT-III proteins mostly
	stimulated growth factor receptors, lysosomal enzymes and lipids. The MVB pathway appears
	mostly are delivered to lysosomes enabling degradation of membrane proteins, such as
	generated by invagination and scission from the limiting membrane of the endosome and

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
