Datasheet for ABIN3137156 TRPV4 Protein (AA 1-465) (His tag)

Image

Overview

| Quantity: | 1 mg |
|-------------------------------|--|
| Target: | TRPV4 |
| Protein Characteristics: | AA 1-465 |
| Origin: | Mouse |
| Source: | Insect Cells |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This TRPV4 protein is labelled with His tag. |
| Application: | Crystallization (Crys), ELISA, SDS-PAGE (SDS), Western Blotting (WB) |

Product Details

| Grade: | Crystallography grade |
|------------------|---|
| Endotoxin Level: | Protein is endotoxin free. |
| Sterility: | 0.22 µm filtered |
| Purity: | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot. |
| | 2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot. |
| | In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE. Protein containing fractions of the best purification are subjected to second purification step |
| Purification: | Two step purification of proteins expressed in baculovirus infected SF9 insect cells: |
| | the Expasy's protparam tool to determine the absorption coefficient of each protein. |
| | The concentration of the protein is calculated using its specific absorption coefficient. We use |
| | specific reference buffer. |
| | The protein's absorbance will be measured in several dilutions and is measured against its |
| | The concentration of our recombinant proteins is measured using the absorbance at 280nm. |
| | protein experts will do everything to make sure that you receive the protein you ordered. |
| | folded protein. With no financial risk on your end you can rest assured that our experienced |
| | experiments or purification optimization). When you order this made-to-order protein you will only pay upon receival of the correctly |
| | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression |
| | (other companies might charge you for any performed steps in the expression process for |
| | In the unlikely event that the protein cannot be expressed or purified we do not charge anything |
| | cannot be expressed or purified. |
| | made proteins from other companies is that there is no financial obligation in case the protein |
| | The big advantage of ordering our made-to-order proteins in comparison to ordering custom |
| | experts in the lab will ensure that you receive a correctly folded protein. |
| | This protein is a made to order protein and will be made for the first time for your order. Our |
| | State-of-the-art algorithm used for plasmid design (Gene synthesis). |

Product Details

 Target:
 TRPV4

 Alternative Name:
 Trpv4 (TRPV4 Products)

| Target Details | |
|---------------------|--|
| Background: | Non-selective calcium permeant cation channel involved in osmotic sensitivity and |
| | mechanosensitivity (PubMed:11094154). Activation by exposure to hypotonicity within the |
| | physiological range exhibits an outward rectification (PubMed:14691263, PubMed:16571723). |
| | Also activated by heat, low pH , citrate and phorbol esters (PubMed:14691263). Increase of |
| | intracellular Ca(2+) potentiates currents. Channel activity seems to be regulated by a |
| | calmodulin-dependent mechanism with a negative feedback mechanism (By similarity). Acts as |
| | a regulator of intracellular Ca(2+) in synoviocytes (By similarity). Plays an obligatory role as a |
| | molecular component in the nonselective cation channel activation induced by 4-alpha-phorbol |
| | 12,13-didecanoate and hypotonic stimulation in synoviocytes and also regulates production of |
| | IL-8 (By similarity). Together with PKD2, forms mechano- and thermosensitive channels in |
| | cilium (PubMed:18695040). Promotes cell-cell junction formation in skin keratinocytes and |
| | plays an important role in the formation and/or maintenance of functional intercellular barriers |
| | (PubMed:20413591). Negatively regulates expression of PPARGC1A, UCP1, oxidative |
| | metabolism and respiration in adipocytes (PubMed:23021218). Regulates expression of |
| | chemokines and cytokines related to proinflammatory pathway in adipocytes |
| | (PubMed:23021218). Together with AQP5, controls regulatory volume decrease in salivary |
| | epithelial cells (PubMed:16571723). {ECO:0000250 UniProtKB:Q9HBA0, |
| | EC0:0000269 PubMed:11094154, EC0:0000269 PubMed:14691263, |
| | ECO:0000269 PubMed:16571723, ECO:0000269 PubMed:18174177, |
| | EC0:0000269 PubMed:18695040, EC0:0000269 PubMed:20413591, |
| | EC0:0000269 PubMed:23021218}. |
| Molecular Weight: | 53.0 kDa Including tag. |
| UniProt: | Q9EPK8 |
| Pathways: | Hormone Transport, Cell-Cell Junction Organization |
| Application Details | |
| Application Notes: | In addition to the applications listed above we expect the protein to work for functional studies |
| | as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee |
| | though. |
| Comment: | Protein has not been tested for activity yet. In cases in which it is highly likely that the |
| | recombinant protein with the default tag will be insoluble our protein lab may suggest a higher |
| | molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible |
| | options with you in detail to assure that you receive your protein of interest. |
| Restrictions: | For Research Use only |

Handling

| Format: | Liquid |
|------------------|--|
| Buffer: | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer. |
| Handling Advice: | Avoid repeated freeze-thaw cycles. |
| Storage: | -80 °C |
| Storage Comment: | Store at -80°C. |
| Expiry Date: | Unlimited (if stored properly) |
