Datasheet for ABIN3137171 TNFRSF21 Protein (AA 42-349) (His tag)

Overview

Image

Quantity:	1 mg
Target:	TNFRSF21
Protein Characteristics:	AA 42-349
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This TNFRSF21 protein is labelled with His tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys)

Product Details

Sequence:	QPEQKTLSLP GTYRHVDRTT GQVLTCDKCP AGTYVSEHCT NMSLRVCSSC PAGTFTRHEN	
	GIERCHDCSQ PCPWPMIERL PCAALTDREC ICPPGMYQSN GTCAPHTVCP VGWGVRKKGT	
	ENEDVRCKQC ARGTFSDVPS SVMKCKAHTD CLGQNLEVVK PGTKETDNVC GMRLFFSSTN	
	PPSSGTVTFS HPEHMESHDV PSSTYEPQGM NSTDSNSTAS VRTKVPSGIE EGTVPDNTSS	
	TSGKEGTNRT LPNPPQVTHQ QAPHHRHILK LLPSSMEATG EKSSTAIKAP KRGHPRQNAH	
	KHFDINEH	
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a	
	special request, please contact us.	
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Mouse Tnfrsf21 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. 	
	State-of-the-art algorithm used for plasmid design (Gene synthesis).

Product Details	
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Target:	TNFRSF21
Alternative Name:	Tnfrsf21 (TNFRSF21 Products)

Background: Promotes apoptosis, possibly via a pathway that involves the activation of NF-kappa-B. Can

	also promote apoptosis mediated by BAX and by the release of cytochrome c from the
	mitochondria into the cytoplasm. Plays a role in neuronal apoptosis, including apoptosis in
	response to amyloid peptides derived from APP, and is required for both normal cell body death
	and axonal pruning. Trophic-factor deprivation triggers the cleavage of surface APP by beta-
	secretase to release sAPP-beta which is further cleaved to release an N-terminal fragment of
	APP (N-APP). N-APP binds TNFRSF21, this triggers caspase activation and degeneration of
	both neuronal cell bodies (via caspase-3) and axons (via caspase-6). Negatively regulates
	oligodendrocyte survival, maturation and myelination. Plays a role in signaling cascades
	triggered by stimulation of T-cell receptors, in the adaptive immune response and in the
	regulation of T-cell differentiation and proliferation. Negatively regulates T-cell responses and
	the release of cytokines such as IL4, IL5, IL10, IL13 and IFNG by Th2 cells. Negatively regulates
	the production of IgG, IgM and IgM in response to antigens. May inhibit the activation of JNK in
	response to T-cell stimulation. {ECO:0000269 PubMed:11485735,

	ECO:0000269 PubMed:23559013}.
Molecular Weight:	34.5 kDa Including tag.
UniProt:	Q9EPU5
Pathways:	Regulation of Lipid Metabolism by PPARalpha
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
Application Notes.	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.

		J

Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
