Datasheet for ABIN3137325 ELOVL2 Protein (AA 1-292) (rho-1D4 tag)

Overview

Quantity:	1 mg
Target:	ELOVL2
Protein Characteristics:	AA 1-292
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This ELOVL2 protein is labelled with rho-1D4 tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)
Product Details	
Sequence:	MEQLKAFDNE VNAFLDNMFG PRDSRVRGWF LLDSYLPTFI LTITYLLSIW LGNKYMKNRP
	ALSLRGILTL YNLAITLLSA YMLVELILSS WEGGYNLQCQ NLDSAGEGDV RVAKVLWWYY
	FSKLVEFLDT IFFVLRKKTN QITFLHVYHH ASMFNIWWCV LNWIPCGQSF FGPTLNSFIH
	ILMYSYYGLS VFPSMHKYLW WKKYLTQAQL VQFVLTITHT LSAVVKPCGF PFGCLIFQSS
	YMMTLVILFL NFYIQTYRKK PVKKELQEKE VKNGFPKAHL IVANGMTDKK AQ
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	Mouse ElovI2 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to
	ensure crystallization grade.
	• State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 1/4 | Product datasheet for ABIN3137325 | 09/11/2023 | Copyright antibodies-online. 	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Three step purification of membrane proteins expressed in baculovirus infected SF9 insect
	cells:
	 Membrane proteins are fractioned by ultracentrifugation and subsequently solubilized with different detergents (detergent screen). Samples are analyzed by Western blot. The best performing detergent is used for solubilization and the proteins are purified via their rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other one not. Eluate fractions are analyzed by Western blot.
	 Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatograph. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin-free.
Grade:	Crystallography grade
Target Details	
Target:	ELOVL2
Alternative Name:	Elovl2 (ELOVL2 Products)

Target Details

Background:	Catalyzes the first and rate-limiting reaction of the four that constitute the long-chain fatty acids
	elongation cycle. This endoplasmic reticulum-bound enzymatic process, allows the addition of
	2 carbons to the chain of long- and very long-chain fatty acids/VLCFAs per cycle. Acts
	specifically toward polyunsaturated acyl-CoA with the higher activity toward C20:4(n-6) acyl-
	CoA. Condensing enzyme that catalyzes the synthesis of polyunsaturated very long chain fatty
	acid (C20- and C22-PUFA). May participate to the production of polyunsaturated VLCFAs of
	different chain lengths that are involved in multiple biological processes as precursors of
	membrane lipids and lipid mediators. Essential for the formation of C24:5(n-6) up to C30:5(n-6)
	PUFAs in testis, these fatty acids being indispensable for normal spermatogenesis and fertility.
	{EC0:0000255 HAMAP-Rule:MF_03202, EC0:0000269 PubMed:12371743,
	ECO:0000269 PubMed:21106902}.
Molecular Weight:	35.4 kDa Including tag.
UniProt:	Q9JLJ4
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage: Storage Comment:	-80 °C Store at -80°C.
