antibodies

Datasheet for ABIN3137344 HCST Protein (AA 18-79) (rho-1D4 tag)

Overview

Image

Quantity:	1 mg
Target:	HCST
Protein Characteristics:	AA 18-79
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This HCST protein is labelled with rho-1D4 tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), Crystallization (Crys), ELISA

Product Details

Sequence:	SQTSAGSCSG CGTLSLPLLA GLVAADAVMS LLIVGVVFVC MRPHGRPAQE DGRVYINMPG RG Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Mouse Hcst Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 1/4 | Product datasheet for ABIN3137344 | 09/11/2023 | Copyright antibodies-online. All rights reserved.

In the unlikely event that the protein cannot be expressed or purified we do not charge (other companies might charge you for any performed steps in the expression proce custom-made proteins, e.g. fees might apply for the expression plasmid, the first ex experiments or purification optimization).	ess for

	pression
experiments or purification optimization)	
experiments of pumeation optimization).	
When you order this made-to-order protein you will only pay upon receival of the cor	rectly
folded protein. With no financial risk on your end you can rest assured that our expe	rienced
protein experts will do everything to make sure that you receive the protein you orde	red.
The concentration of our recombinant proteins is measured using the absorbance a	t 280nm.
The protein's absorbance will be measured in several dilutions and is measured aga	inst its
specific reference buffer.	
The concentration of the protein is calculated using its specific absorption coefficient	nt. We use
the Expasy's protparam tool to determine the absorption coefficient of each protein	
Purification: Three step purification of membrane proteins expressed in baculovirus infected SF9 cells:	insect
1. Membrane proteins are fractioned by ultracentrifugation and subsequently solubi different detergents (detergent screen). Samples are analyzed by Western blot.	lized with
2. The best performing detergent is used for solubilization and the proteins are purif rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other one no	
fractions are analyzed by Western blot. 3. Protein containing fractions of the best purification are subjected to second purification are analyzed by SDS-PAG through size exclusion chromatograph. Eluate fractions are analyzed by SDS-PAG Western blot.	•
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Bl	ot.
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin-free.	
Grade: Crystallography grade	
Target Details	
Target: HCST	
Alternative Name: Hcst (HCST Products)	

Background:	Transmembrane adapter protein which associates with KLRK1 to form an activation receptor
	KLRK1-HCST in lymphoid and myeloid cells, this receptor plays a major role in triggering
	cytotoxicity against target cells expressing cell surface ligands such as MHC class I chain-
	related MICA and MICB, and UL16-binding proteins (ULBPs), these ligands are up-regulated by

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3137344 | 09/11/2023 | Copyright antibodies-online. All rights reserved.

	stress conditions and pathological state such as viral infection and tumor transformation.
	Functions as docking site for PI3-kinase PIK3R1 and GRB2. Interaction of ULBPs with KLRK1-
	HCST triggers calcium mobilization and activation of the PIK3R1, MAP2K/ERK, and
	JAK2/STAT5 signaling pathways. Both PIK3R1 and GRB2 are required for full KLRK1-HCST-
	mediated activation and ultimate killing of target cells. In NK cells, KLRK1-HCST signaling
	directly induces cytotoxicity and enhances cytokine production initiated via DAP12/TYROBP-
	associated receptors. In T-cells, it provides primarily costimulation for TCR-induced signals.
	KLRK1-HCST receptor plays a role in immune surveillance against tumors and is required for
	cytolysis of tumors cells, indeed, melanoma cells that do not express KLRK1 ligands escape
	from immune surveillance mediated by NK cells. {ECO:0000269 PubMed:10528161,
	ECO:0000269 PubMed:12426565, ECO:0000269 PubMed:15365099,
	ECO:0000269 PubMed:16086018, ECO:0000269 PubMed:16887996,
	ECO:0000269 PubMed:17100879}.
Molecular Weight:	7.5 kDa Including tag.
UniProt:	Q9QUJ0
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the
	recombinant protein with the default tag will be insoluble our protein lab may suggest a higher
	molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible
	options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	' 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
