Datasheet for ABIN3137498 SCNN1B Protein (AA 1-638) (rho-1D4 tag)

Overview

| Quantity: | 1 mg |
|-------------------------------|--|
| Target: | SCNN1B |
| Protein Characteristics: | AA 1-638 |
| Origin: | Mouse |
| Source: | Insect Cells |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This SCNN1B protein is labelled with rho-1D4 tag. |
| Application: | Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys) |

Product Details

| Characteristics: Made in Germany - from design to production - by highly experienced protein Mouse Scnn1b Protein (raised in Insect Cells) purified by multi-step, protein- to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made to order protein and will be made for the first time for you experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to order made proteins from other companies is that there is no financial obligation in order cannot be expressed or purified. | |
|--|-------------------|
| experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to ord made proteins from other companies is that there is no financial obligation in o | · |
| The big advantage of ordering our made-to-order proteins in comparison to or made proteins from other companies is that there is no financial obligation in o | our order. Our |
| made proteins from other companies is that there is no financial obligation in o | |
| | dering custom |
| cannot be expressed or purified. | case the protein |
| | |
| In the unlikely event that the protein cannot be expressed or purified we do not | t charge anything |
| (other companies might charge you for any performed steps in the expression | process for |
| custom-made proteins, e.g. fees might apply for the expression plasmid, the fi | rst expression |
| experiments or purification optimization). | |
| When you order this made-to-order protein you will only pay upon receival of th | ne correctly |
| folded protein. With no financial risk on your end you can rest assured that our | experienced |
| protein experts will do everything to make sure that you receive the protein you | u ordered. |
| The concentration of our recombinant proteins is measured using the absorba | ance at 280nm. |
| The protein's absorbance will be measured in several dilutions and is measure | ed against its |
| specific reference buffer. | |
| The concentration of the protein is calculated using its specific absorption coe | efficient. We use |
| the Expasy's protparam tool to determine the absorption coefficient of each pr | rotein. |
| Purification: Three step purification of membrane proteins expressed in baculovirus infecte | ed SF9 insect |
| cells: | |
| 1. Membrane proteins are fractioned by ultracentrifugation and subsequently s | |
| different detergents (detergent screen). Samples are analyzed by Western b | |
| The best performing detergent is used for solubilization and the proteins are rho1D4 tag via two rho1D4 antibody columns: one DTT resistant, the other compared to the protein of the protei | |
| fractions are analyzed by Western blot. | |
| 3. Protein containing fractions of the best purification are subjected to second | |
| through size exclusion chromatograph. Eluate fractions are analyzed by SDS | S-PAGE and |
| Western blot. | |
| Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and West | ern Blot. |
| Sterility: 0.22 µm filtered | |
| Endotoxin Level: Protein is endotoxin-free. | |

Product Details

Grade:

Crystallography grade

Target Details

| Target: | SCNN1B |
|---------------------|--|
| Alternative Name: | Scnn1b (SCNN1B Products) |
| Background: | Sodium permeable non-voltage-sensitive ion channel inhibited by the diuretic amiloride. Mediates the electrodiffusion of the luminal sodium (and water, which follows osmotically) through the apical membrane of epithelial cells. Plays an essential role in electrolyte and blood pressure homeostasis, but also in airway surface liquid homeostasis, which is important for proper clearance of mucus. Controls the reabsorption of sodium in kidney, colon, lung and sweat glands. Also plays a role in taste perception. {ECO:000269 PubMed:10409305}. |
| Molecular Weight: | 73.4 kDa Including tag. |
| UniProt: | Q9WU38 |
| Application Details | |
| Application Notes: | In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though. |
| Comment: | Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest. |
| Restrictions: | For Research Use only |
| Handling | |
| Format: | Liquid |
| Buffer: | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer. |
| Handling Advice: | Avoid repeated freeze-thaw cycles. |
| Storage: | -80 °C |
| Storage Comment: | Store at -80°C. |
| Expiry Date: | Unlimited (if stored properly) |
