## Datasheet for ABIN3137577 AIF Protein (AA 102-612) (His tag)

I Image

#### Overview

Quantity:	1 mg
Target:	AIF (AIFM1)
Protein Characteristics:	AA 102-612
Origin:	Mouse
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This AIF protein is labelled with His tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys)

#### Product Details

	special request, please contact us.
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a

<ul> <li>Characteristics:</li> <li>Made in Germany - from design to production - by highly experienced protein expert</li> <li>Mouse Aifm1 Protein (raised in E. Coli) purified by multi-step, protein-specific proces ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> <li>This protein is a made to order protein and will be made for the first time for your order</li> </ul>	ss to
This protein is a made to order protein and will be made for the first time for your orde	r. Our
experts in the lab will ensure that you receive a correctly folded protein.	
The big advantage of ordering our made-to-order proteins in comparison to ordering c	ustom
made proteins from other companies is that there is no financial obligation in case the	protein
cannot be expressed or purified.	
In the unlikely event that the protein cannot be expressed or purified we do not charge	anything
(other companies might charge you for any performed steps in the expression process	s for
custom-made proteins, e.g. fees might apply for the expression plasmid, the first expre	ession
experiments or purification optimization).	
When you order this made-to-order protein you will only pay upon receival of the correc	otly
folded protein. With no financial risk on your end you can rest assured that our experie	nced
protein experts will do everything to make sure that you receive the protein you ordere	d.
The concentration of our recombinant proteins is measured using the absorbance at 2	280nm.
The protein's absorbance will be measured in several dilutions and is measured agains	st its
specific reference buffer.	
The concentration of the protein is calculated using its specific absorption coefficient.	We use
the Expasy's protparam tool to determine the absorption coefficient of each protein.	
Purification: Two step purification of proteins expressed in bacterial culture:	
<ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using th different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Elua fractions are analyzed by SDS-PAGE.</li> </ol>	te
<ol> <li>Protein containing fractions of the best purification are subjected to second purifica through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE Western blot.</li> </ol>	•
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot	
Sterility: 0.22 µm filtered	
Endotoxin Level: Endotoxin has not been removed. Please contact us if you require endotoxin removal.	
Grade: Crystallography grade

Target Details	
Target:	AIF (AIFM1)
Alternative Name:	Aifm1 (AIFM1 Products)
Background:	Functions both as NADH oxidoreductase and as regulator of apoptosis. In response to apoptotic stimuli, it is released from the mitochondrion intermembrane space into the cytosol and to the nucleus, where it functions as a proapoptotic factor in a caspase-independent pathway. In contrast, functions as an antiapoptotic factor in normal mitochondria via its NADH oxidoreductase activity. The soluble form (AIFsol) found in the nucleus induces 'parthanatos' i.e. caspase-independent fragmentation of chromosomal DNA. Interacts with EIF3G,and thereby inhibits the EIF3 machinery and protein synthesis,and activates casapse-7 to amplify apoptosis. Plays a critical role in caspase-independent, pyknotic cell death in hydrogen peroxide-exposed cells. Binds to DNA in a sequence-independent manner (By similarity). {EC0:000250, EC0:000269 PubMed:9989411}.
Molecular Weight:	56.5 kDa Including tag.
UniProt:	Q9Z0X1
Pathways:	Apoptosis, Positive Regulation of Endopeptidase Activity, Cell RedoxHomeostasis, Smooth Muscle Cell Migration, Warburg Effect
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 3/4 | Product datasheet for ABIN3137577 | 09/11/2023 | Copyright antibodies-online. #### Handling

Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
