

## Datasheet for ABIN3154210 IGSF8 Protein (AA 26-577) (His tag)

Overview	
Quantity:	2 mg
Target:	IGSF8
Protein Characteristics:	AA 26-577
Origin:	Mouse
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This IGSF8 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys)
Product Details	
Sequence:	RQVHVPRGPL YRVAGTAVSI SCNVSDYEGP AQQDFEWFMY RPEAPATSLG IVSTKDSQFS
	YAVFGPRVAS GDLQVQRLKG DSVVLKIARL QAQDSGFYEC YTPSTDTQYL GNYSAKVELR

<ul> <li>Characteristics:</li> <li>Made in Germany - from design to production - by highly experienced</li> <li>Mouse Igsf8 Protein (raised in Insect Cells) purified by multi-step, pro ensure crystallization grade.</li> </ul>	
State-of-the-art algorithm used for plasmid design (Gene synthesis).	
This protein is a made to order protein and will be made for the first tim	e for your order. Our
experts in the lab will ensure that you receive a correctly folded protein.	
The big advantage of ordering our made-to-order proteins in compariso	on to ordering custom
made proteins from other companies is that there is no financial obliga	tion in case the protein
cannot be expressed or purified.	
In the unlikely event that the protein cannot be expressed or purified we	e do not charge anything
(other companies might charge you for any performed steps in the exp	ression process for
custom-made proteins, e.g. fees might apply for the expression plasmic	d, the first expression
experiments or purification optimization).	
When you order this made-to-order protein you will only pay upon receiv	val of the correctly
folded protein. With no financial risk on your end you can rest assured t	hat our experienced
protein experts will do everything to make sure that you receive the prot	tein you ordered.
The concentration of our recombinant proteins is measured using the a	bsorbance at 280nm.
The protein's absorbance will be measured in several dilutions and is m	easured against its
specific reference buffer.	
The concentration of the protein is calculated using its specific absorpt	ion coefficient. We use
the Expasy's protparam tool to determine the absorption coefficient of	each protein.
Purification: Two step purification of proteins expressed in baculovirus infected SF9	insect cells:
<ol> <li>In a first purification step, the protein is purified from the cleared cell different His-tag capture materials: high yield, EDTA resistant, or DTT fractions are analyzed by SDS-PAGE.</li> </ol>	resistant. Eluate
<ol> <li>Protein containing fractions of the best purification are subjected to s through size exclusion chromatography. Eluate fractions are analyze Western blot.</li> </ol>	
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography an	d Western Blot.
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin free.	
Grade: Crystallography grade

## Target Details

Target:	IGSF8
Alternative Name:	Igsf8 (IGSF8 Products)
Background:	May play a key role in diverse functions ascribed to CD81 and CD9 such as oocytes fertilization or hepatitis C virus function. May regulate proliferation and differentiation of keratinocytes. May be a negative regulator of cell motility: suppresses T-cell mobility coordinately with CD81, associates with CD82 to suppress prostate cancer cell migration, regulates epidermoid cell reaggregation and motility on laminin-5 with CD9 and CD81 as key linkers. May also play a role on integrin-dependent morphology and motility functions. May participate in the regulation of neurite outgrowth and maintenance of the neural network in the adult brain. {ECO:0000269 PubMed:11673522, ECO:0000269 PubMed:16203089}.
Molecular Weight:	59.6 kD. Including tag.
UniProt:	Q8R366
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	Protein has not been tested for activity yet. In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)

Expiry Date: Unlimited (if stored properly)
