Target Details

Target:	BCL2L13
Abstract:	BCL2L13 Products
Background:	Bcl rambo shares common structural characteristics with other members of the anti-apoptotic

Target Details

Bcl2 family members, but differs from them at its C-terminus, where a 250 amino acid sequence precedes the membrane anchor region. It also differs from other pro-apoptotic Bcl-2 family members in that its membrane anchor C-terminus region is responsible for its apoptotic activity, not its Bcl-2 homology motifs. Bcl rambo may promote the activation of caspase-3 and apoptosis. Synonyms: BCL2L13, Bcl-2-like protein 13, Bcl-rambo, Bcl2-L-13, CD003, MIL1

Gene ID: 23786, 9606
