Datasheet for ABIN361846 anti-RAB5 antibody

5 Images

1 Publication

Overview

| Quantity: | 100 µg |
|--------------|--|
| Target: | RAB5 (RAB5A) |
| Reactivity: | Human |
| Host: | Rabbit |
| Clonality: | Polyclonal |
| Conjugate: | This RAB5 antibody is un-conjugated |
| Application: | Western Blotting (WB), Immunohistochemistry (IHC), Immunofluorescence (IF), Immunocytochemistry (ICC) |

Product Details

| Immunogen: | Human Rab5 synthetic peptide conjugated to KLH, identical to dog Rab5 sequence over the residues |
|-------------------|--|
| Specificity: | Detects ~26 kDa. |
| Cross-Reactivity: | Cow, Human, Monkey, Mouse, Rat |
| Purification: | Protein A Purified |

Target Details

| Target: | RAB5 (RAB5A) |
|-------------------|---|
| Alternative Name: | Rab5 (RAB5A Products) |
| Background: | Rab5 is a 24 kDa member of the Rab family of small guanosine triphosphatases (GTPases), |
| | Ras superfamily. Rab GTPases are central regulators of membrane trafficking in the eukaryotic |

All rights reserved. cell. Their regulatory capacity depends on their ability to cycle between the GDP -bound inactive and GTP-bound active states. This conversion is regulated by GDP/GTP exchange factors (GEPs), GDP dissociation inhibitors (GDIs) and GTPase-activating proteins (GAPs) (1, 2). Activation of a Rab protein is coupled to its association with intracellular membranes, allowing it to recruit downstream effector proteins to the cytoplasmic surface of a subcellular compartment (3). Through these proteins, Rab GTPases regulate vesicle formation, actin- and tubulin-dependent vesicle movement, and membrane fusion(1). Rab proteins contain conserved regions involved in guanine-nucleotide binding, and hyper variable COHO-terminal domains with a cysteine motif implicated in subcellular targeting. Post-translational modification of the cysteine motif with one or two geranyl groups is essential for the membrane association and correct intracellular localization of Rab proteins(3). Each Rab shows a characteristic subcellular distribution (4). In particular, Rab5 is ubiquitously expressed in human tissues. It localizes mainly to early endosomes, but is also present on the plasma membrane. It regulates the fusion between endocytic vesicles and early endosomes, as well as the homotypic fusion between early endosomes (5). Among the proteins recruited by the GTPbound active Rab5 are Rabaptin-5 and EEA1 (6). Anti-Rab5 may be used as an early endosome marker.

| Gene ID: | 5868 | |
|---------------------|---|--|
| NCBI Accession: | NP_004153 | |
| UniProt: | P20339 | |
| Pathways: | Smooth Muscle Cell Migration, Regulation of long-term Neuronal Synaptic Plasticity | |
| Application Details | | |
| Application Notes: | WB (1:1000) IHC (1:100) ICC/IF (1:80) optimal dilutions for assays should be determined by the user. | |
| Comment: | 1 μl/ml of ABIN361845 was sufficient for detection of Rab5 in 15 μg of HeLa lysate by ECL immunoblot analysis using Donkey anti-rabbit IgG:HRP as the secondary antibody. | |
| Restrictions: | For Research Use only | |
| Handling | | |
| Format: | Liquid | |
| | | |

Handling

| Concentration: | 1 mg/mL |
|--------------------|--|
| Buffer: | PBS, 50 % glycerol, 0.09 % sodium azide, Storage buffer may change when conjugated |
| Preservative: | Sodium azide |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage: | -20 °C |
| Storage Comment: | -20°C |

Immunocytochemistry

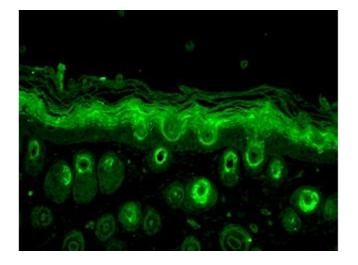

Image 1. Immunocytochemistry/Immunofluorescence analysis using Rabbit Anti-Rab5 Polyclonal Antibody (ABIN361845 and ABIN361846). Tissue: Cervical cancer cell line (HeLa). Species: Human. Fixation: 2 % Formaldehyde for 20 min at RT. Primary Antibody: Rabbit Anti-Rab5 Polyclonal Antibody (ABIN361845 and ABIN361846) at 1:80 for 12 hours at 4 °C. Secondary Antibody: FITC Goat Anti-Rabbit (green) at 1:200 for 2 hours at RT. Counterstain: DAPI (blue) nuclear stain at 1:40000 for 2 hours at RT. Localization: Cytoplasm. Melanosome. Nucleus. Magnification: 20x. (A) DAPI (blue) nuclear stain. (B) Anti-Rab5 Antibody. (C) Composite.
