Datasheet for ABIN369607

Monoglyceride Lipase (MGLL) Peptide

| 3 | Images |

Overview

Quantity:	100 μg
Target:	MGLL
Origin:	Human, Rat, Cow, Dog, Mouse, Pig
Source:	Synthetic
Application:	Blocking Peptide (BP), Immunogen (Imm)

Product Details

Sequence:	QDLPHLVNAD GQY
Characteristics:	The peptide was used in the production of ABIN369607 - Goat Anti-Monoglyceride Lipase Antibody. It is currently untested in blocking applications.

Target Details

Target:	MGLL

Application Details

|	
Application Notes:	When peptides are reconstituted in 200ul water, the concentration would be also 0.5mg/ml. To start, the best ratio would be 1:1 (which means molar excess of peptides relative to antibodies when identical volumes are mixed). Please mix equal volumes of peptide and antibody at the required dilution and leave at ambient temperature. Best is to have two identical blots, to be incubated with equal amount of antibodies, but one with the antibodies pre-adsorbed to the peptide for 20min. Then incubate and develop in parallel the two blots.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Reconstitution:	Reconstitute pellet in distilled water where required. For Blocking studies, reconstitute pellet in 200µl distilled water to obtain a 0.5mg/ml peptide solution.
Buffer:	100µg of Lyophilised peptide, formulation De-ionized (DI) water.
Storage:	-20 °C
Storage Comment:	Shipped at ambient temperature, store at -20°C.
