# Sirtuin 4 (SIRT4) Peptide

**Images** 

#### Overview

| Quantity:    | 100 μg                                 |
|--------------|--|
| Target:      | SIRT4                                  |
| Origin:      | Human, Rat, Cow, Dog, Mouse, Pig       |
| Source:      | Synthetic                              |
| Application: | Blocking Peptide (BP), Immunogen (Imm) |

# **Product Details**

| Sequence:        | SRCGELLPLI DPC  |
|------------------|---|
| Characteristics: | The peptide was used in the production of ABIN370464 - Goat Anti-SIRT4 Antibody. It is currently untested in blocking applications. |
| Tayout Dataila   |   |

#### Target Details

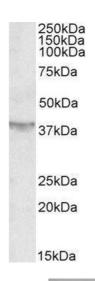

# **Application Details**

| Application Details |   |
|---------------------|---|
| Application Notes:  | When peptides are reconstituted in 200ul water, the concentration would be also 0.5mg/ml. To    |
|                     | start, the best ratio would be 1:1 (which means molar excess of peptides relative to antibodies |
|                     | when identical volumes are mixed). Please mix equal volumes of peptide and antibody at the      |
|                     | required dilution and leave at ambient temperature. Best is to have two identical blots, to be  |
|                     | incubated with equal amount of antibodies, but one with the antibodies pre-adsorbed to the      |
|                     | peptide for 20min. Then incubate and develop in parallel the two blots.                         |
| Restrictions:       | For Research Use only   |

# Handling

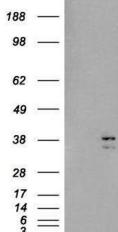

| Format:          | Lyophilized  |
|------------------|--|
| Reconstitution:  | Reconstitute pellet in distilled water where required. For Blocking studies, reconstitute pellet in 200µl distilled water to obtain a 0.5mg/ml peptide solution. |
| Buffer:          | 100μg of Lyophilised peptide, formulation De-ionized (DI) water.   |
| Storage:         | -20 °C   |
| Storage Comment: | Shipped at ambient temperature, store at -20°C.  |
