Target Details

Target:	CD24
Alternative Name:	CD24 (CD24 Products)
Background:	CD24, also known as heat stable antigen, is a phosphatidylinositol-linked cell surface

Target Details

glycoprotein that is expressed at all stages of B cell development and on most thymocytes. The absence of expression from mature T cells is closely associated with their maturation from CD4 + CD8 + CD24 + thymocytes to either CD4 + CD8 - CD24 - or CD4 - CD8 + CD24 - T cells. CD24 is also present on mouse granulocytes, monocytes, Langerhans cells and erythrocytes. Its ligand is P-selectin (CD62P). CD24 may play a role in regulation of B cell proliferation and differentiation, and it has been proposed that heat stable antigen promotes homotypic adhesion between B lymphocytes.
