Target Details

Target:	CD45 (PTPRC)
Alternative Name:	CD45R (PTPRC Products)
Background:	CD45R/B220, a member of the protein tyrosine phosphate family and a major cell surface

Target Details

glycoprotein, represents a restricted form of the CD45 family which primarily recognizes only cells of B-lineage from pro-B cell through mature B lymphocytes and, prior to the availability of anti-CD19 MAbs, was commonly used as a pan B-cell marker. It also reacts with certain activated T cells, as well as non-MHC-restricted lytically active lymphokine-activated killer (LAK) cells.
