Datasheet for ABIN376983
Neutralite Avidin Protein

1 Image

Overview

Quantity:	5 mg
Target:	Neutralite Avidin
Origin:	Chicken
Source:	Chicken eggs
Protein Type:	Native
Application:	Flow Cytometry (FACS), Immunohistochemistry (IHC), ELISA, Western Blotting (WB)

Product Details

Characteristics: Source: Neutralized (pI = 6.3), deglycosylated avidin purified from egg white.
Mr/Structure 60 kDa tetramer of four identical subunits, each containing a single binding site.
To insure lot-to-lot consistency, each batch of product is tested by flow cytometry, particle concentration fluorescence immunoassay (PCFIA) or ELISA to conform to characteristics of a standard reference reagent.

Purification: Purified

Target Details

Target: Neutralite Avidin

Application Details

Application Notes: Each laboratory should determine an optimum working titer for use in its particular application.
Other applications have not been tested but use in such assays should not necessarily be excluded.

Application Details

Sample Volume: 1 mL

Restrictions: For Research Use only

Handling

Buffer: Product is supplied as 5.0 mg protein in 1.0 mL of 100 mM borate buffered saline, pH 8.2.

Preservative: Azide free

Handling Advice: Each reagent is stable for the period shown on the bottle label if stored as directed.

Storage: 4 °C
