

Datasheet for ABIN377006  
**Aposcreen Annexin V-UNLB**[Go to Product page](#)

## 1 Image

## Overview

Quantity:	100 µg
Target:	Annexin V (ANXA5)
Application:	Flow Cytometry (FACS)

## Product Details

Characteristics:	To insure acceptable performance, each batch of product is tested by flow cytometry to conform to the characteristics of a standard reference reagent.
Purification:	Purified

## Target Details

Target:	Annexin V (ANXA5)
Abstract:	<a href="#">ANXA5 Products</a>

## Application Details

Application Notes:	Each laboratory should determine an optimum working titer for use in its particular application. Other applications have not been tested but use in such assays should not necessarily be excluded.
Restrictions:	For Research Use only

## Handling

Buffer:	Product is supplied as 100 tests in 1.0 mL of phosphate buffered saline containing 0.1 % PBS / NaN 3.
---------	---

Handling

Preservative:	Sodium azide
Precaution of Use:	<p>WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or inhaled. Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If skin or eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact a physician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditions. Dilute azide-containing compounds in running water before discarding to avoid accumulation of potentially explosive deposits in lead or copper plumbing.</p>
Handling Advice:	Each reagent is stable for the period shown on the bottle label if stored as directed.
Storage:	4 °C
