Quantity:	400 μL	
Target:	EPH Receptor B1 (EPHB1)	
Binding Specificity:	AA 955-984, C-Term	
Reactivity:	Human, Mouse	
Host:	Rabbit	
Clonality:	Polyclonal	
Conjugate:	This EPH Receptor B1 antibody is un-conjugated	
Application:	Western Blotting (WB), Immunohistochemistry (Paraffin-embedded Sections) (IHC (p))	
Product Details		
Immunogen:	This EphB1 antibody is generated from rabbits immunized with a KLH conjugated synthetic	
	peptide between 955-984 amino acids from the C-terminal region of human EphB1.	
	peptide between 933-964 arrillio acids from the C-terminal region of number.	
Clone:	RB1648	
Clone:		
	RB1648	
Isotype:	RB1648 Ig Fraction	
Isotype:	RB1648 Ig Fraction This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by	
Isotype: Purification:	RB1648 Ig Fraction This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by	

Target Details

Background:	Protein kinases are enzymes that transfer a phosphate group from a phosphate donor,		
	generally the g phosphate of ATP, onto an acceptor amino acid in a substrate protein. By this		
	basic mechanism, protein kinases mediate most of the signal transduction in eukaryotic cells,		
	regulating cellular metabolism, transcription, cell cycle progression, cytoskeletal rearrangement		
	and cell movement, apoptosis, and differentiation. With more than 500 gene products, the		
	protein kinase family is one of the largest families of proteins in eukaryotes. The family has		
	been classified in 8 major groups based on sequence comparison of their tyrosine (PTK) or		
	serine/threonine (STK) kinase catalytic domains. The tyrosine kinase (TK) group is mainly		
	involved in the regulation of cell-cell interactions such as differentiation, adhesion, motility and		
	death. There are currently about 90 TK genes sequenced, 58 are of receptor protein TK (e.g.		
	EGFR, EPH, FGFR, PDGFR, TRK, and VEGFR families), and 32 of cytosolic TK (e.g. ABL, FAK,		
	JAK, and SRC families).		
Molecular Weight:	109885		
Gene ID:	2047		
NCBI Accession:	NP_004432		
UniProt:	P54762		
Pathways:	RTK Signaling		
Application Details			
Application Notes:	WB: 1:1000. WB: 1:1000. WB: 1:1000. IHC-P: 1:50~100. IHC-P: 1:50~100		
Restrictions:	For Research Use only		
Handling			
Format:	Liquid		
Buffer:	Purified polyclonal antibody supplied in PBS with 0.09 % (W/V) sodium azide.		
Preservative:	Sodium azide		
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which		
	should be handled by trained staff only.		
Storage:	4 °C,-20 °C		
Storage Comment:	Maintain refrigerated at 2-8 °C for up to 6 months. For long term storage store at -20 °C in small		
	aliquots to prevent freeze-thaw cycles.		

Expiry Date:

6 months

Immunohistochemistry (Paraffin-embedded Sections)

Image 1. Formalin-fixed and paraffin-embedded human cancer tissue reacted with the primary antibody, which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry, clinical relevance has not been evaluated. BC = breast carcinoma, HC = hepatocarcinoma.

Western Blotting

Image 2. Western blot analysis of anti-EphB1 Pab (ABIN391917 and ABIN2841727) in mouse brain tissue. EphB1 (arrow) was detected using purified Pab. Secondary HRP-anti-rabbit was used for signal visualization with chemiluminescence.

Western Blotting

Image 3. Western blot analysis of lysates from A431, Hela, MDA-MB-453 cell line (from left to right), using EPHB1 Antibody (ABIN391917 and ABIN2841727). (ABIN391917 and ABIN2841727) was diluted at 1:1000 at each lane. A goat anti-rabbit lgG H&L(HRP) at 1:5000 dilution was used as the secondary antibody. Lysates at 35 μg per lane.

Please check the product details page for more images. Overall 5 images are available for ABIN391917.
