Datasheet for ABIN4219123

Opti-Seal qPCR Full-skirted plate (Low profile)

Overview

Quantity:	100 plates
Application:	Quantitative real-time PCR (qPCR)

Product Details

Brand:	Opti-Seal
Specificity:	All Opti-Seal qPCR plates are nucleases-free, pyrogen-free, and nucleic acids-free.
Compatible Machine:	<ul style="list-style-type: none">- Bio-Rad-CFX96TM- Bio-Rad-OpticonTM- Bio-Rad-Opticon2TMr />- Bio-Rad-Chromo4TM- Eppendorf-Mastercycler® ep realplex

Characteristics: Opti-Seal qPCR plates are 96 wells plate made in a standard 8*12 configuration with thin-walled design, allowing rapid and efficient thermal transfer. Opti-Seal qPCR plates have both standard(0.2 mL) and low-profile (0.1 mL) versions tailoring to your needs. All Opti-Seal qPCR plates are molded with precision from high-quality polypropylene to achieve optimal well-to-well and plate-to-plate consistency. The interior of the wells has an ultra smooth and inert surface on which nucleic acids and enzymes do not bind to. Opti-Seal qPCR plates have alphanumeric grid for easy sample identification. In addition, all Opti-Seal qPCR plates are nucleases-free, pyrogen-free, and nucleic acids-free.

Application Details

Application Notes: Sealing can be performed with Opti-Seal qPCR Sealing and Storage Films which is compatible

Application Details

with almost all 96-well thermal cyclers.

Comment: 100 Plates/Case

Restrictions: For Research Use only
