## Opti-Seal qPCR Roche 480 (Low profile)

### Overview

Quantity:	100 plates
Application:	Quantitative real-time PCR (qPCR)

### Product Details

Brand:	Opti-Seal
Specificity:	All Opti-Seal qPCR plates are nucleases-free, pyrogen-free, and nucleic acids-free.
Compatible Machine:	- Roche LightCycler 480

**Characteristics:** Opti-Seal qPCR plates are 96 wells plate made in a standard 8 x 12 configuration with thin-walled design, allowing rapid and efficient thermal transfer. Opti-Seal qPCR plates have both standard (0.2 ml) and low-profile (0.1 ml) versions tailoring to your needs. All Opti-Seal qPCR plates are molded with precision from high-quality polypropylene to achieve optimal well-to-well and plate-to-plate consistency. The interior of the wells has an ultra smooth and inert surface on which nucleic acids and enzymes do not bind to. Opti-Seal qPCR plates have alphanumeric grid for easy sample identification. In addition, all Opti-Seal qPCR plates are nucleases-free, pyrogen-free, and nucleic acids-free.

### Application Details

Application Notes:	Sealing can be performed with Opti-Seal qPCR Sealing and Storage Films which is compatible with almost all 96-well thermal cyclers.
Comment:	100 Plates/Case
Restrictions:	For Research Use only
