Datasheet for ABIN4219248

Opti-Seal qPCR Semi-skirted plate (Standard)

Overview

Quantity:	100 plates
Application:	Quantitative real-time PCR (qPCR)

Product Details

Brand:	Opti-Seal
Specificity:	All Opti-Seal qPCR plates are nucleases-free, pyrogen-free, and nucleic acids-free. Compatible Machine: - ABI-7000, 7003, 7500, 7700, 7900 - ABI-7900HT Standard 96-well Block - ABI-ViiA7TM - Bio-Rad-iCyclerTM - Bio-Rad-iQTM4/5 - Bio-Rad-MyiQ/MyiQ2r />- Eppendorf-Mx4000@r />- Eppendorf-Mx3000P@ - Eppendorf-Mx3005PTM

Characteristics:	Opti-Seal qPCR plates are 96 wells plate made in a standard 8*12 configuration with thin-walled design, allowing rapid and efficient thermal transfer. Opti-Seal qPCR plates have both standard(0.2 mL) and low-profile (0.1 mL) versions tailoring to your needs. All Opti-Seal qPCR plates are molded with precision from high-quality polypropylene to achieve optimal well-to-well and plate-to-plate consistency. The interior of the wells has an ultra smooth and inert surface on which nucleic acids and enzymes do not bind to. Opti-Seal qPCR plates have alphanumeric grid for easy sample identification. In addition, all Opti-Seal qPCR plates are nucleases-free, pyrogen-free, and nucleic acids-free.
------------------	---

Application Details

Application Notes:	Sealing can be performed with Opti-Seal qPCR Sealing and Storage Films which is compatible with almost all 96-well thermal cyclers.
Comment:	100 Plates/Case
Restrictions:	For Research Use only
