Datasheet for ABIN457308 anti-CD15 antibody (APC)

4 Images

Overview

Quantity:	100 tests
Target:	CD15 (FUT4)
Reactivity:	Human
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This CD15 antibody is conjugated to APC
Application:	Flow Cytometry (FACS)

Product Details

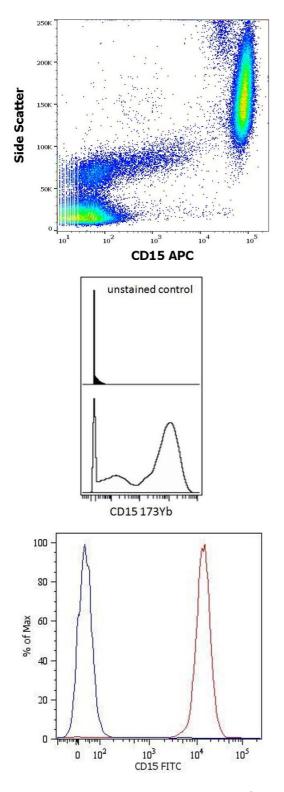

Immunogen:	Human granulocytes
Clone:	MEM-158
lsotype:	IgM
Specificity:	The antibody MEM-158 reacts with CD15, a cell membrane molecule 3-fucosyl-N-acetylla ctosamine (3-FAL) strongly expressed on the surface of granulocytes, monocytes, macrophages, mast cells, it is also present on Langerhans cells and some myeloid precursors cells.
No Cross-Reactivity:	Cow, Pig, Sheep
Cross-Reactivity (Details):	Human
Purification:	Purified antibody is conjugated with activated allophycocyanin (APC) under optimum conditions and unconjugated antibody and free fluorochrome are removed by size-exclusion

Target:	CD15 (FUT4)
Alternative Name:	CD15 (FUT4 Products)
Background:	CD15 (Lewis x), also known as stage specific embryonic antigen-1 (SSEA-1) is a trisacharide determinant (3-fucosyl-N-acetyllactosamine) expressed on several glycolipids, glycoproteins and proteoglycans of various cell types, e.g. granulocytes, mast cells, monocytes,
	macrophages, cells of gastric mucosa, nervous system or various tumour cells. There are several structural relatives of Lewis x, e.g. sialyl-Lewis x or sulphated Lewis x. Cells with high
	surface expression of Le(x) antigen exhibit strong self-aggregation, based on calcium- dependent Le(x)-Le(x) interaction. This process is involved for example in embryo compaction or in autoaggregation of teratocarcinoma cells. Sialyl-Le(x) and its isomer sialyl-Le(a) are
	ligands of selectins. CD15 expression has been extensively used to confirm diagnosis of Hodgkin's disease.,Lewis x Blood Group antigen, Le(x), SSEA-1, 3-fucosyl-N-acetyllactosamine
Application Details	
Application Notes:	Flow cytometry: The reagent is designed for analysis of human blood cells using 10 μL reagent / 100 μL of whole blood or 10 ⁶ cells in a suspension. The content of a vial (1 ml) is sufficient for 100 tests.
Comment:	The purified antibody is conjugated with cross-linked Allophycocyanin (APC) under optimum conditions. The conjugate is purified by size-exclusion chromatography and adjusted for direct use. No reconstitution is necessary.
Restrictions:	For Research Use only
Handling	
Reconstitution:	No reconstitution is necessary.
Buffer:	Stabilizing Tris buffered saline (TBS), pH 8.0, 15 mM sodium azide
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Handling Advice:	Do not freeze. Avoid prolonged exposure to light.
