Overview

Quantity:	0.1 mg
Target:	HSV-1+2 gB (HSV1/2 gB)
Reactivity:	Herpes Simplex Virus (HSV)
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This HSV-1+2 gB antibody is un-conjugated
Application:	ELISA, Immunocytochemistry (ICC)

Product Details

Immunogen:	Extract of HSV-1 infected VERO (green monkey kidney) cells.
Clone:	T111
Isotype:	IgG2b
Specificity:	The antibody T111 recognizes gB antigen of both HSV1 and HSV2 (Herpes Simplex Virus type 1 and 2), a dsDNA virus, member of Herpesviridae family.
Cross-Reactivity (Details):	HSV
Purification:	Purified by protein-A affinity chromatography.
Purity:	> 95 % (by SDS-PAGE)

Target Details

Target:	HSV-1+2 gB (HSV1/2 gB)
---------	------------------------

Target Details

Alternative Name: HSV1 + HSV2 (glycoprotein B) ([HSV1/2 gB Products](#))

Target Type: Viral Protein

Background: Envelope glycoprotein B, Herpes simplex virus (HSV) is a virus that manifests itself in two common viral infections. There are actually two types of herpes simplex virus, HSV1 and HSV2. These are very similar in many ways, and both can cause either oral herpes or genital herpes. HSV1 - most commonly develops into oral herpes infecting the lips (fever blisters or cold sores). HSV1 can also infect the genital area causing sores to develop. HSV2 - generally infects the genital area (genital herpes), however, HSV2 can also infect the mouth., HSVGB, HSV-1 gB, HSV-2 gB

Gene ID: 24271469

UniProt: [P10211](#)

Application Details

Application Notes: Optimal working dilution should be determined by the investigator.

Restrictions: For Research Use only

Handling

Concentration: 1 mg/mL

Buffer: Phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide

Preservative: Sodium azide

Precaution of Use: This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Handling Advice: **Do not freeze.**

Storage: 4 °C

Storage Comment: Store at 2-8°C. Do not freeze.
