## Datasheet for ABIN457965 anti-Complement C3d antibody

Overview

| Quantity:        | 1 mL  |
|------------------|---|
| Target:          | Complement C3d (C3d)  |
| Reactivity:      | Human   |
| Host:            | Goat  |
| Clonality:       | Polyclonal  |
| Conjugate:       | This Complement C3d antibody is un-conjugated   |
| Application:     | Immunoelectrophoresis (IEP)   |
| Product Details  |   |
| Immunogen:       | C3d is a component of complement. Cell-bound C3b may undergo limited proteolysis to release<br>the fragment C3c and retain C3d on the membrane. The protein is isolated and purified from<br>pooled normal human serum by precipitation techniques, followed by chromatographical<br>methods. Freund's complete adjuvant is used in the first step of the immunization procedure. |
| lsotype:         | lgG   |
| Specificity:     | Inter-species cross-reactivity is a normal feature of antibodies to plasma proteins, since<br>homologous proteins of different species frequently share antigenic determinants. of this<br>antiserum has not been tested in detail.   |
| Characteristics: | Precipitating polyclonal goat antiserum to C3d subunit of human complement C3   |
| Purification:    | Adsorption: Immunoaffinity adsorbed using insolubilized antigens as required, to eliminate<br>antibodies reacting with other human serum proteins. The use of insolubilized adsorption<br>antigens prevents the presence of excess adsorbent protein or immune complexes in the   |

## Product Details

antiserum.

## Target Details

| Target:             | Complement C3d (C3d)  |
|---------------------|---|
| Alternative Name:   | C3d Subunit of Complement C3 (C3d Products)   |
| Background:         | Tested in immunoelectrophoresis and double radial immunodiffusion against normal human serum, a single precipitin line is obtained and giving a reaction of full identity with the purified |
|                     | immunogen. The antiserum is also reacting with fragments bearing common determinants: C3,   |
|                     | C3b, C3bi. The product does not react with any other proteins component of human serum or   |
|                     | plasma. In supernatants of sera containing 10% polyethyleneglycol only a reaction with C3d has  |
|                     | been obtained   |
| Application Details |   |
| Application Notes:  | In precipitating techniques as immunoelectrophoresis and single and double radial immuno-   |
|                     | diffusion (Mancini, Ouchterlony) to identify the presence of complement C3d or to determine its   |
|                     | concentration. The presence of non-precipitating antibodies has not been assayed. This does   |
|                     | not exclude the use of the antiserum in non-precipitating antibody-binding techniques if proper   |
|                     | controls are included. Determinations of individual complement components can be very usefu   |
|                     | in defining the exact location of a defect.   |
| Restrictions:       | For Research Use only   |
| Handling            |   |
| Format:             | Lyophilized   |
| Concentration:      | Total protein and IgG concentrations in the antiserum are comparable to those of normal   |
|                     | pooled goat serum. No foreign proteins added. Antibody titre: Precipitin titre not less than 1:16   |
|                     | when tested against normal human plasma in agar-block immunodiffusion   |
| Buffer:             | Delipidated, heat inactivated, lyophilized, stable whole serum.   |
| Preservative:       | Without preservative  |
| Storage:            | 4 °C/-20 °C   |
| Storage Comment:    | The lyophilized antiserum is shipped at ambient temperature and may be stored at +4°C,  |
|                     | prolonged storage at or below -20°C. Reconstitute the lyophilized antiserum by add ing 1 ml   |
|                     | sterile distilled water. Dilutions may be prepared by adding phosphate buffered saline (PBS, pH   |

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/3 | Product datasheet for ABIN457965 | 01/25/2024 | Copyright antibodies-online. All rights reserved. 7.2). Repeated thawing and freezing should be avoided. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the antiserum. Diluted antiserum should be stored at +4°C, not ref rozen, and preferably used the same day.
