Pooled Goat colostrum

Overview

Quantity:	0.5 mL
Host:	Goat
Application:	Immunodiffusion (ID), Immunoelectrophoresis (IEP), Nephelometry (Neph), Radial Immunodiffusion (RID), ELISA, Western Blotting (WB)

Product Details

Protein Source:	Colostrum
Components:	Pooled Goat colostrum
Lysate Type:	Normal

Application Details

Application Notes:

As a qualitative reference with an optimized protein content to study the normal protein composition of goat colostrum. To identify or quantitate a normal colostrum protein component using a variety of immunodiffusion techniques including immunoelectrophoresis, single and double radial immuno-diffusion and electroimmunodiffusion. As a reference in nephelometry and other automated precipitation techniques. As a blocking agent or as a negative control in non-precipitating antibody-binding assays e.g. in serodiagnostic immunofluores-cence and immunoenzyme tests. This normal reference does not contain assigned values for individual proteins but can be used as an internal relative standard for quantitative protein assays such as double radial immunodiffusion (Mancini, Fahey), ELISA, Western immuno-blotting and electroimmunodiffusion (Laurell), expressing the results obtained with the sample under investigation as a percentage of the protein concentration in the normal reference.

Application Details

Storage:

4°C

Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Buffer:	Delipidated, heat inactivated, lyophilized, stable whole colostrums.
Preservative:	Without preservative
