Datasheet for ABIN459176 anti-CRAT antibody

| Overview | |
|------------------|--|
| Quantity: | 10 mg |
| Target: | CRAT |
| Reactivity: | Pigeon |
| Host: | Rabbit |
| Clonality: | Polyclonal |
| Conjugate: | This CRAT antibody is un-conjugated |
| Application: | Western Blotting (WB), ELISA, Immunofluorescence (IF) |
| Product Details | |
| Immunogen: | Carnitine acetyltransferase isolated and purified from pigeon breast muscle. Freund's complete adjuvant is used in the first step of the immunization procedure. |
| lsotype: | lgG |
| Specificity: | Cross-reactivities against enzymes of other sources may occur but have not been determined. |
| Characteristics: | IgG fraction of polyclonal rabbit antiserum to carnitine acetyltransferase from pigeon breast muscle |
| Purification: | The IgG (7S) fraction is prepared from the antiserum by ammonium sulphate precipitation and ion exchange chromatography. |

Target Details

| Target: | CRAT |
|-------------------|---|
| Alternative Name: | Carnitine Acetyltransferase (CRAT Products) |

| Target Details | |
|---------------------|--|
| Background: | The reagents were evaluated for potency, purity and specificity using most or all of the following techniques: immunoelectrophoresis, cross-immunoelectrophoresis, single radial |
| | immunodiffusion (Ouchterlony), block titration, ELISA, immunoblotting and enzyme inhibition. |
| Pathways: | Monocarboxylic Acid Catabolic Process |
| Application Details | |
| Application Notes: | This product is intended for use in precipitating and non-precipitating antibody-binding assays |
| | (such as e.g., ELISA and Western blotting and immunofluorescence or histochemical |
| | techniques), to prepare an insoluble immuno-affinity adsorbent, for labelling with a marker of the customer's own choice. |
| Restrictions: | For Research Use only |
| Handling | |
| Format: | Lyophilized |
| Concentration: | IgG protein concentration 10 mg/ml. No foreign proteins added. |
| Buffer: | Purified hyperimmune rabbit IgG lyophilised from a solution in phosphate buffered saline (PBS |
| | pH 7.2). |
| Preservative: | Without preservative |
| Storage: | 4 °C/-20 °C |
| Storage Comment: | The lyophilised IgG fraction is shipped at ambient temperature and may be stored at +4°C, |
| | prolonged storage at or below -20°C. It is reconsti tuted by adding 1.0 ml sterile distilled water |
| | spun down to remove insoluble particles, divided into small aliquots, frozen and stored at or |
| | below -20°C. Prior to use, an aliquot is thawed slowly at a mbient temperature, spun down |
| | again and used to prepare working dilutions by adding sterile phosphate buffered saline (PBS, |
| | pH 7.2). Repeated thawing and freezing should be avoided. Working dilutions should be stored |
| | at +4°C, not refrozen, and preferably used t he same day. If a slight precipitation occurs upon |
| | storage, this should be removed by centrifugation. It will not affect the performance of the |
| | product. |
