## .-online.com antibodies

## Datasheet for ABIN459258 anti-PLA2G1B antibody

| Overview         |  |
|------------------|--|
| Quantity:        | 10 mg  |
| Target:          | PLA2G1B  |
| Reactivity:      | Pig  |
| Host:            | Rabbit   |
| Clonality:       | Polyclonal   |
| Conjugate:       | This PLA2G1B antibody is un-conjugated   |
| Application:     | Western Blotting (WB), ELISA, Immunofluorescence (IF)  |
| Product Details  |  |
| Immunogen:       | Phospholipase A 2 isolated and purified from porcine pancreas. Freund's complete adjuvant is |
|                  | used in the first step of the immunization procedure.  |
| lsotype:         | lgG  |
| Specificity:     | Cross-reactivities against enzymes of other sources may occur but have not been determined.  |
| Characteristics: | IgG fraction of polyclonal rabbit antiserum to phospholipase A 2 from porcine pancreas       |
| Purification:    | The IgG (7S) fraction is prepared from the antiserum by ammonium sulphate precipitation and  |
|                  | ion exchange chromatography.   |
|                  |  |

## Target Details

| Target:           | PLA2G1B                              |
|-------------------|--------------------------------------|
| Alternative Name: | Phospholipase A 2 (PLA2G1B Products) |

| Target Details      |  |
|---------------------|--|
| Background:         | The reagents were evaluated for potency, purity and specificity using most or all of the           |
|                     | following techniques: immunoelectrophoresis, cross-immunoelectrophoresis, single radial            |
|                     | immunodiffusion (Ouchterlony), block titration, ELISA, immunoblotting and enzyme inhibition.       |
| Pathways:           | Inositol Metabolic Process, VEGF Signaling   |
| Application Details |  |
| Application Notes:  | This product is intended for use in precipitating and non-precipitating antibody-binding assays    |
|                     | (such as e.g., ELISA and Western blotting and immunofluorescence or histochemical                  |
|                     | techniques), to prepare an insoluble immuno-affinity adsorbent, for labelling with a marker of     |
|                     | the customer's own choice.   |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Lyophilized  |
| Concentration:      | IgG protein concentration 10 mg/ml. No foreign proteins added.                                     |
| Buffer:             | Purified hyperimmune rabbit IgG lyophilised from a solution in phosphate buffered saline (PBS      |
|                     | рН 7.2).   |
| Preservative:       | Without preservative   |
| Storage:            | 4 °C/-20 °C  |
| Storage Comment:    | The lyophilised IgG fraction is shipped at ambient temperature and may be stored at +4°C,          |
|                     | prolonged storage at or below -20°C. It is reconsti tuted by adding 1.0 ml sterile distilled water |
|                     | spun down to remove insoluble particles, divided into small aliquots, frozen and stored at or      |
|                     | below -20°C. Prior to use, an aliquot is thawed slowly at a mbient temperature, spun down          |
|                     | again and used to prepare working dilutions by adding sterile phosphate buffered saline (PBS,      |
|                     | pH 7.2). Repeated thawing and freezing should be avoided. Working dilutions should be stored       |
|                     | at +4°C, not refrozen, and preferably used t he same day. If a slight precipitation occurs upon    |
|                     | storage, this should be removed by centrifugation. It will not affect the performance of the       |
|                     | product.   |
