Datasheet for ABIN459383
Microcystin ELISA Kit

Overview

Quantity:	96 tests
Target:	Microcystin
Reactivity:	Cyanobacteria (Nostoc)
Method Type:	Competition ELISA
Minimum Detection Limit:	50 ng/mL
Application:	ELISA

Product Details

Sample Type:	Water
Analytical Method:	Quantitative
Detection Method:	Colorimetric

Target Details

Target:	Microcystin
---------	-------------

Application Details

Comment:	Origin of standards: microcystin LR Number of standards: 8
Plate:	Pre-coated
Restrictions:	For Research Use only
