Application Details

Application Notes:	Approved: Flo
	Usage: This 13A antibody is offered in 2 formats:- µg size: has been tested intracellular staining
	of cultured mouse splenocytes. This can be used at less than or equal to 0.25 µg per test. A test
	is defined as the amount (ug)/test of antibody that will stain a cell sample in a final volume of
	100 μL . Cell number should be determined empirically but can range from 10^5 to 10^8
	cells/test test size: has been pre-titrated and tested intracellular staining of cultured mouse
	splenocytes. This can be used at test size: 5 μL (0.125 $\mu\text{g})/\text{per}$ test The pre-titrated test size
	contains BSA and/or gelatin for protein stabilization. The applications listed have been tested
	for the unconjugated form of this product. Other forms have not been tested.
