Application Details		
Application Notes:	Approved: Flo, IP	
	Usage: This 4E10 (4E10) antibody has been tested by flow cytometric analysis of mouse lysed whole blood. This can be used at less than or equal to 1 μ g per test. A test is defined as the amount (ug) of antibody that will stain a cell sample in a final volume of 100 μ L. Cell number should be determined empirically but can range from 10^5 to 10^8 cells/test. It is recommended that the antibody be carefully titrated for optimal performance in the assay of interest.
