Application Details

Application Notes:	Approved: Flo
	Usage: This F38-2E2 antibody has been pre-titrated and tested by flow cytometric analysis of Th1-polarized normal human peripheral blood cells. This can be used at 5 µL (0.06 µg)/per test. A test is defined as the amount (ug)/test of antibody that will stain a cell sample in a final volume of 100 µL. Cell number should be determined empirically but can range from 10 ⁵ to 10 ⁸ cells/test. The applications listed have been tested for the unconjugated form of this product. Other forms have not been tested.
