Overview

Quantity:	100 tests
Target:	CD3
Reactivity:	Human, Non-Human Primate
Host:	Mouse
Clonality:	Monoclonal
Conjugate:	This CD3 antibody is conjugated to APC
Application:	Flow Cytometry (FACS)

Product Details

Immunogen:	human thymocytes followed by Sezary T cells
Clone:	UCHT1
Isotype:	lgG1
Specificity:	The antibody UCHT1 recognizes an extracellular epitope on CD3 antigen of the TCR/CD3 complex on mature human T cells. The UCHT1 antibody reacts with the epsilon chain of the CD3 complex.
Cross-Reactivity (Details):	Human, Non-Human Primates
Purification:	Purified antibody is conjugated with activated allophycocyanin (APC) under optimum conditions and unconjugated antibody and free fluorochrome are removed by size-exclusion chromatography.

Target Details

Target:	CD3
Alternative Name:	CD3 (CD3 Products)
Background:	CD3 antigen, epsilon polypeptide,CD3 complex is crucial in transducing antigen-recognition
	signals into the cytoplasm of T cells and in regulating the cell surface expression of the TCR
	complex. T cell activation through the antigen receptor (TCR) involves the cytoplasmic tails of
	the CD3 subunits CD3 gamma, CD3 delta, CD3 epsilon and CD3 zeta. These CD3 subunits are
	structurally related members of the immunoglobulins super family encoded by closely linked
	genes on human chromosome 11. The CD3 components have long cytoplasmic tails that
	associate with cytoplasmic signal transduction molecules. This association is mediated at least
	in part by a double tyrosine-based motif present in a single copy in the CD3 subunits. CD3 may
	play a role in TCR-induced growth arrest, cell survival and proliferation. The CD3 antigen is
	present on 68-82 % of normal peripheral blood lymphocytes, 65-85 % of thymocytes and
	Purkynje cells in the cerebellum. It is never expressed on B or NK cells. Decreased percentages
	of T lymphocytes may be observed in some autoimmune diseases.,CD3E, T3E, TCRE
Gene ID:	916
UniProt:	P07766
Pathways:	TCR Signaling, Ubiquitin Proteasome Pathway
Application Details	
Application Notes:	Flow cytometry: The reagent is designed for analysis of human blood cells using 10 µL reagent
	/ 100 μL of whole blood or 10^6 cells in a suspension. The content of a vial (1 ml) is sufficient for
	100 tests. Extracellular and intracellular staining.
Comment:	The purified antibody is conjugated with cross-linked Allophycocyanin (APC) under optimum
	conditions. The conjugate is purified by size-exclusion chromatography and adjusted for direct
	use. No reconstitution is necessary.
Restrictions:	For Research Use only
Handling	
	All and the second of the seco
Reconstitution:	No reconstitution is necessary.
Reconstitution: Buffer:	Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide

Handling

Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Handling Advice:	Do not freeze. Avoid prolonged exposure to light.
Storage:	4 °C
Storage Comment:	Store at 2-8°C. Protect from prolonged exposure to light. Do not freeze.
