

Datasheet for ABIN4966294 anti-RGL2 antibody

Overview	
Quantity:	50 µg
Target:	RGL2
Reactivity:	Arabidopsis thaliana
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This RGL2 antibody is un-conjugated
Application:	Western Blotting (WB)
Product Details	
Immunogen:	KLH-conjugated synthetic peptide derived from Arabidopsis thaliana RGL2 protein, UniProt: Q8GXW1, TAIR: At3g03450
Cross-Reactivity (Details):	Not reactive in: Triticum sp.
Target Details	
Target:	RGL2
Alternative Name:	RGA-like protein 2 (DELLA protein) (RGL2)
Background:	DELLA protein RGL2 is a probable transcriptional regulator that acts as a repressor of the gibberellin (GA) signaling pathway. Involved in the biosynthesis of abscisic acid (ABA), delays flowering and leaf production, reulates floral development, petal, stamen and anther development. Predominantly expressed in germinating seeds, flowers and siliques. Synonymes: GRAS family protein 15, AtGRAS-15, Scarecrow-like protein 19, AtSCL19.

Target Details

Molecular Weight:	60 kDa
UniProt:	Q8GXW1

Application Details

Application Notes:	1 : 1000 with standard ECL (WB) on transfected Arabidopsis thaliana protoplasts
Comment:	As this protein is expressed in tissue in very low levels, please load at least 50 $\boldsymbol{\mu}$
	g/well.Recommended extraction and denaturation protocol: Arabidopsis thaliana seedlings
	were ground in liquid nitrogen (100 μl of 2.5 x Laemli for 80-120 mg of homogenized material)
	and boiled for 2 min. at 95°C in 2,5x Laemmli Buffer (with 60 Mm DTT final concentration)
	otherwise RGA protein will degrade.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Reconstitution:	For reconstitution add 50 μL of sterile water.
Storage:	-20 °C
Storage Comment:	store lyophilized/reconstituted at -20°C, once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please, remember to spin tubes briefly prior to opening them to avoid any
	losses that might occur from lyophilized material adhering to the cap or sides of the tubes.
