

## Datasheet for ABIN4967551 **HLA-DQA2 ELISA Kit**

[Go to Product page](#)

### Overview

|                          |                        |
|--------------------------|------------------------|
| Quantity:                | 96 tests               |
| Target:                  | HLA-DQA2               |
| Reactivity:              | Cow                    |
| Method Type:             | Sandwich ELISA         |
| Detection Range:         | 1.56 ng/mL - 100 ng/mL |
| Minimum Detection Limit: | 1.56 ng/mL             |
| Application:             | ELISA                  |

### Product Details

|                    |                                                            |
|--------------------|------------------------------------------------------------|
| Purpose:           | Cow BOLA-DQA2 ELISA Kit is an ELISA Kit against BOLA-DQA2. |
| Sample Type:       | Plasma, Serum, Tissue Homogenate                           |
| Analytical Method: | Quantitative                                               |
| Detection Method:  | Colorimetric                                               |
| Sensitivity:       | < 0.938 ng/mL                                              |

### Target Details

|                   |                                                                                                           |
|-------------------|-----------------------------------------------------------------------------------------------------------|
| Target:           | HLA-DQA2                                                                                                  |
| Alternative Name: | BOLA-DQA2 ( <a href="#">HLA-DQA2 Products</a> )                                                           |
| Pathways:         | <a href="#">TCR Signaling</a> , <a href="#">Human Leukocyte Antigen (HLA) in Adaptive Immune Response</a> |

## Application Details

---

|                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Notes: | <p>Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.</p> <p>Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user.</p> <p>Standard Form: Lyophilized</p> |
| Comment:           | <p>The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled.
