OxLDL ELISA Kit

[Go to Product page](#)

Overview

Quantity:	96 tests
Target:	OxLDL
Reactivity:	Human
Method Type:	Indirect ELISA
Detection Range:	3.12 ng/mL - 200 ng/mL
Minimum Detection Limit:	3.12 ng/mL
Application:	ELISA

Product Details

Purpose:	Human Anti-Oxidized Low Density Lipoprotein Antibody (Anti-OxLDL) ELISA Kit is an ELISA kit against Anti-Oxidized Low Density Lipoprotein Antibody (Anti-OxLDL).
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	< 1.18 ng/mL

Target Details

Target:	OxLDL
Alternative Name:	ox-LDL (OxLDL Products)

Application Details

Application Notes:	Stability: The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5 % within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout. Recommended dilutions: Optimal dilutions/concentrations should be determined by the end user. Standard Form: Lyophilized
Comment:	The stability of the kit is determined by the rate of activity loss. The loss rate is less than 5% within the expiration date under appropriate storage conditions. To minimize performance fluctuations, operation procedures and lab conditions should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same user throughout.
Plate:	Pre-coated
Restrictions:	For Research Use only

Handling

Storage:	4 °C/-20 °C
Storage Comment:	Upon receipt, store the kit according to the storage instruction in the kit's manual.
Expiry Date:	6 months
