Datasheet for ABIN4987003 Lambda-IgLC ELISA Kit

Overview

Quantity:	96 tests
Target:	Lambda-IgLC
Reactivity:	Human
Method Type:	Competition ELISA
Detection Range:	0.039-2.5 µg/mL
Minimum Detection Limit:	0.039 µg/mL
Application:	ELISA

Product Details

Sample Type:	Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Sensitivity:	0.021 µg/mL
Material not included:	<ul style="list-style-type: none">• Microplate reader.• Pipettes and pipette tips.• EP tube Deionized or distilled water.

Target Details

Target:	Lambda-IgLC
Alternative Name:	lambda Immunoglobulin Light Chain,lambda-IgLC (Lambda-IgLC Products)

Application Details

Application Notes: Detection Wavelength: 450 nm

Sample Volume: 100 μ L

Assay Time: 1 - 4.5 h

Plate: Pre-coated

Restrictions: For Research Use only

Handling

Storage: 4 °C
