anti-ACE2 antibody (N-Term)

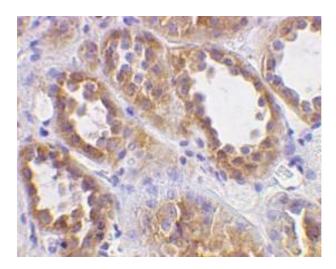

Go to Product page

_				
()	ve.	rv/	101	Λ

Quantity:	0.1 mg
Target:	ACE2
Binding Specificity:	N-Term
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This ACE2 antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)), Enzyme Immunoassay (EIA)
Product Details	
Product Details Immunogen:	Human ACE2 (N-Terminus) Peptide
	Human ACE2 (N-Terminus) Peptide
Immunogen:	
Immunogen: Isotype:	IgG ACE2 antibody was raised against a synthetic peptide corresponding to amino acids near the
Immunogen: Isotype: Specificity:	IgG ACE2 antibody was raised against a synthetic peptide corresponding to amino acids near the N-terminus of human ACE2. Anti-ACE2 has no cross response to ACE1.
Immunogen: Isotype: Specificity: Purification:	IgG ACE2 antibody was raised against a synthetic peptide corresponding to amino acids near the N-terminus of human ACE2. Anti-ACE2 has no cross response to ACE1.

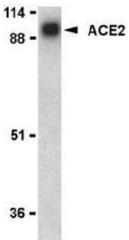

Target Details

9			
Background:	Angiotensin-converting enzyme 2 (ACE2) plays a central role in vascular, renal, and myocardial		
	physiology (1-2). In contrast to its homolog ACE, ACE2 expression is restricted to heart, kidney,		
	and testis. Recently. ACE2 has also been shown to be a functional receptor of the SARS		
	coronavirus (3). The normal function of ACE2 is to convert the inactive vasoconstrictor		
	angiotensin I (Angl) to Ang1-9 and the active form AnglI to Ang1-7, unlike ACE, which converts		
	Angl to Angll. While the role of these vasoactive peptides is not well understood, lack of ACE2		
	expression in ace2-/ace2- mice leads to severely reduced cardiac contractility, indicating its		
	importance in regulating heart function (4). Synonyms: ACE-related carboxypeptidase,		
	Angiotensin-converting enzyme 2, Angiotensin-converting enzyme homolog		
Gene ID:	59272		
NCBI Accession:	NP_068576		
UniProt:	Q9BYF1		
Pathways:	ACE Inhibitor Pathway, Peptide Hormone Metabolism, Regulation of Systemic Arterial Blood		
	Pressure by Hormones, Feeding Behaviour		
Application Details			
Application Notes:	ELISA. Western Blot: ACE2 antibody can be used for the detection of ACE2 at 0.5 to 2 µg/mL. A		
	90 kDa band can be detected. Immunohistochemistry.		
	Other applications not tested.		
	Optimal dilutions are dependent on conditions and should be determined by the user.		
Restrictions:	For Research Use only		
Handling			
Buffer:	PBS containing 0.02 % sodium azide.		
Preservative:	Sodium azide		
Precaution of Use:	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which		
	should be handled by trained staff only.		
Storage:	4 °C		
Storage Comment:	Store the antibody undiluted at 2-8 °C.		

Immunohistochemistry (Paraffin-embedded Sections)

Image 1. Immunohistochemical staining of human kidney cells using AP30008PU-N ACE2 antibody at 2 μ g/ml.

Western Blotting

Image 2. Western blot analysis of ACE2 in human kidney lysate with AP30008PU-N ACE2 antibody at 1 μ g/ml.
