Datasheet for ABIN4993274 TSC22D3 ELISA Kit

Image

Overview

Quantity:	96 tests
Target:	TSC22D3
Reactivity:	Rat
Method Type:	Competition ELISA
Detection Range:	0.156-10 ng/mL
Minimum Detection Limit:	0.156 ng/mL
Application:	ELISA

Product Details

Purpose:	The kit is a competitive enzyme immunoassay for in vitro quantitative measurement of δ SIP in Rat serum, plasma and other biological fluids
Sample Type:	Plasma, Serum
Analytical Method:	Quantitative
Detection Method:	Colorimetric
Specificity:	This kit recognizes natural and recombinant Rat δ SIP. No signif icant cross-reactivity or interference between Rat δ SIP and analogues was observed. Note: Limited by existing techniques, cross reaction may still exist, as it is impossible for us to complete the cross-reactivity detection between Rat δ SIP and all the analogues.
Sensitivity:	0.094 ng/mL
Components:	Micro ELISA Plate(Dismountable) Reference Standard

Product Details

	Concentrated Biotinylated Detection Ab (100×)
	Concentrated HRP Conjugate (100×)
	Reference Standard & Sample Diluent
	Biotinylated Detection Ab Diluent
	HRP Conjugate Diluent
	Concentrated Wash Buffer (25×)
	Substrate Reagent
	Stop Solution
	Plate Sealer
	Product Description
	Certificate of Analysis
Material not included:	Microplate reader with 450nm wavelength filter
	High-precision transferpettor, EP tubes and disposable pipette tips
	37°C Incubator
	Deionized or distilled water
	Absorbent paper
	Loading slot for Wash Buffer

Target Details

Target:	TSC22D3
Alternative Name:	Delta Sleep Inducing Peptide (deltaSIP) (TSC22D3 Products)
Application Details	
Comment:	Information on standard material:
	The formulation of the standard is 0.01 M PBS. The standard contains additives (1 % BSA).
	Information on reagents:
	Reagents include 1 M SO ₂ . Azide, thimerosal, 2-mercaptoethanol (2-ME) or any other poisonous
	materials are not used.
	Information on antibodies:
	The provided antibodies and their host vary in different kits. All antibodies are affinity purified
	The sensitivity of this assay, or Lower Limit of Detection (LLD) was defined as the lowest

	protein concentration that could be differentiated from zero. It was determined by adding two
	standard deviations to the mean optical density value of twenty zero standard replicates and
	calculating the corresponding concentration.
Sample Volume:	50 μL
Plate:	Pre-coated
Protocol:	This ELISA kit uses Competitive-ELISA as the method. The microtiter plate provided in this kit
	has been pre-coated with $\delta SIP.$ During the reaction, δSIP in the sample or standard competes
	with a fixed amount of δSIP on the solid phase supporter for sites on the Biotinylated Detection
	Ab specific to δ SIP. Excess conjugate and unbound sample or standard are washed from the
	plate, and Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well
	and incubated. Then a TMB substrate solution is added to each well. The enzyme-substrate
	reaction is terminated by the addition of a sulphuric acid solution and the color change is
	measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The concentration of δ
	SIP in the samples is then determined by comparing the OD of the samples to the standard
	curve. 6th Edition, revised in June, 2015 www.elabscience.com 4
Restrictions:	For Research Use only
Handling	
Handling Advice:	All the reagents in the kit should be stored according to the labels on vials. Unused wells should
	be returned to the foil pouch with the desiccant pack and resealed along entire edge of zip-seal.
	Substrate Reagent shouldn't be kept at -20 °C (Check!). Exposure of reagents to strong light
	should be avoided in the process of incubation and storage. All the taps of reagents should be
	tightened to prevent evaporation and microbial contamination. If not to store reagents
	according to above suggestions, erroneous results may occur.
Storage:	4 °C/-20 °C
Storage Comment:	The unopened kit can be stored at 4°C for 1 month. If the kit is not used within 1 month,
	store the items separately according to the conditions since the kit is received.
