**anti-AVEN antibody (C-Term)**[Go to Product page](#)

## 2 Images

## Overview

Quantity:	0.1 mg
Target:	AVEN
Binding Specificity:	C-Term
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This AVEN antibody is un-conjugated
Application:	Western Blotting (WB), Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)), Enzyme Immunoassay (EIA)

## Product Details

Immunogen:	Aven antibody was raised against a 14 amino acid peptide from near the carboxy terminus of human Aven.
Isotype:	IgG
Specificity:	This antibody reacts to AVEN.
Purification:	Affinity chromatography purified via peptide column

## Target Details

Target:	AVEN
Alternative Name:	AVEN ( <a href="#">AVEN Products</a> )

## Target Details

Background:	Apoptosis plays a major role in normal organism development, tissue homeostasis, and removal of damaged cells. Disruption of this process has been implicated in a variety of diseases such as cancer. Aven is a recently discovered protein that blocks apoptosis induced by Apaf-1 and caspase-9. It is thought that Aven functions by binding to Bcl-xL, an antiapoptotic member of the Bcl-2 family, and to Apaf-1, possibly interfering with the ability of Apaf-1 to self-associate, suggesting that Aven impedes Apaf-1-mediated caspase activation. Higher levels of Aven mRNA are seen in patients with acute leukemia than in control patients, suggesting that Aven may be useful as a prognostic indicator in leukemia patients. Despite its predicted molecular weight, Aven often migrates at 55 kDa in SDS-PAGE. Synonyms: Cell death regulator Aven, PDCD12, Programmed cell death 12
Gene ID:	57099
NCBI Accession:	<a href="#">NP_065104</a>
UniProt:	<a href="#">Q9NQS1</a>

## Application Details

Application Notes:	ELISA. Western Blot: Aven antibody can be used for detection of Aven at 0.5 to 1 µg/mL. Immunohistochemistry. Other applications not tested. Optimal dilutions are dependent on conditions and should be determined by the user.
Restrictions:	For Research Use only

## Handling

Buffer:	PBS containing 0.02 % sodium azide.
Preservative:	Sodium azide
Precaution of Use:	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	4 °C
Storage Comment:	Store the antibody undiluted at 2-8 °C.

#### Immunohistochemistry (Paraffin-embedded Sections)

**Image 1.** Immunohistochemistry of Aven in human spleen tissue with Aven antibody at 5 µg/ml.

#### Western Blotting

**Image 2.** Western blot analysis of Aven in Raji cell lysate with AP30098PU-N Aven antibody at 1 µg/ml in (A) the presence and (B) the absence of blocking peptide.
