

## Datasheet for ABIN4997567 anti-Fibrinogen antibody (AbBy Fluor® 750)

Overview

Quantity:	100 μL
Target:	Fibrinogen
Reactivity:	Cow
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This Fibrinogen antibody is conjugated to AbBy Fluor® 750
Application:	Immunofluorescence (Paraffin-embedded Sections) (IF (p)), Immunofluorescence (Cultured Cells) (IF (cc))

## Product Details

Immunogen:	Fibrinogen from bovine plasma
Isotype:	IgG
Cross-Reactivity:	Cow
Predicted Reactivity:	Cow
Purification:	Purified by Protein A.

## Target Details

Target:	Fibrinogen
Alternative Name:	Bovine Fibrinogen (Fibrinogen Products)
Background:	Synonyms: FGA, FGA protein, FGB, FGG, Fib2, Fibrin alpha chain ,Fibrinogen A alpha

polypeptide, Fibrinogen A alpha polypeptide chain, Fibrinogen alpha chain, Fibrinogen B alpha
polypeptide, Fibrinogen beta chain, Fibrinogen G alpha polypeptide, Fibrinogen gamma chain,
MGC104327, MGC119422, MGC119423, MGC119425, MGC120405.
Background: Fibrinogen is the main protein of blood coagulation system. It is a large protein
and it consists of two identical subunits that contain three polypeptide chains: alpha, beta and
gamma. All chains are connected with each other by a number of disulfide bonds.
Fibrinopeptides A (1 to 16 amino acids) and B (1 to 17 amino acids) are released by thrombin
from the N terminal parts of alpha and beta chains, respectively. In this way fibrinogen is
converted into fibrin, which by means of polymerization forms a fibrin clot. Fibrinogen clotting
underlies pathogenesis of MI, thromboembolism and thromboses of arteries and veins, since
fibrin is the main substrate for thrombus formation. Fibrinogen activation is also involved in
pathogenesis of inflammation, tumor growth and many other diseases. The normal fibrinogen
concentration in plasma is about 3 mg/mL. The elevated level of fibrinogen in patient's blood is
regarded as an independent risk factor for cardiovascular diseases. An increase in blood
fibrinogen concentration was shown to be a strong predictor of coronary heart disease (Sonel
A. et al, and Rapold H.J. et al). All these facts make fibrinogen an important parameter in the
diagnosis of cardiovascular diseases.

Gene ID:

522039

## Application Details

Application Notes:	IF(IHC-P) 1:50-200 IF(IHC-F) 1:50-200
	IF(ICC) 1:50-200
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	1 µg/µL
Buffer:	Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be

handled by trained staff only.

Handling	
Storage:	-20 °C
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
Expiry Date:	12 months
