Target Details

mitochondrial, Coiled-coil domain-containing protein 56, Mitochondrial translation regulation assembly intermediate of cytochrome c oxidase protein of 12 kDa, COA3

Background: Component of some MITRAC complex, a cytochrome c oxidase (COX) assembly intermediate complex that regulates COX assembly. MITRAC complexes regulate both translation of mitochondrial encoded components and assembly of nuclear-encoded components imported in mitochondrion. Required for efficient translation of MT-CO1 and mitochondrial respiratory chain complex IV assembly.
