Background:	Synonyms: RCC1 and BTB domain-containing protein 1, Chronic lymphocytic leukemia deletion		
	region gene 7 protein, CLL deletion region gene 7 protein, Regulator of chromosome		
	condensation and BTB domain-containing protein 1, RCBT1_HUMAN.		
	Background: This gene encodes a protein with an N-terminal RCC1 domain and a C-terminal		
	BTB (broad complex, tramtrack and bric-a-brac) domain. In rat, over-expression of this gene in		
	vascular smooth muscle cells induced cellular hypertrophy. In rat, the C-terminus of RCBTB1		
	interacts with the angiotensin II receptor-1A. In humans, this gene maps to a region of		
	chromosome 13q that is frequently deleted in B-cell chronic lymphocytic leukemia and other		
	lymphoid malignancies. [provided by RefSeq, Jul 2008].
